

# AMP<sup>GSTM</sup> Intelligent Document Processing with AWS

**TRANSFORM FINANCIAL INFORMATION INTO ACTIONABLE INSIGHTS**

The financial services industry has been keeping records for centuries. Those records come in many forms and contain vital information about your customers. From loan applications, bank statements, invoices, transaction records and more, these documents are at the core of your business operations and require a large sum of time and resources to process. With our Intelligent Document Processing solution on AWS, you can digitize information in minutes instead of weeks or months, eliminating slow, error-prone work that comes with paper records.

## Intelligent Document Processing Transformation

Go beyond OCR with accurate, versatile information extraction to enhance operational efficiency, unlock insights, and bolster decision-making. TEKsystems Global Services' proprietary document processing framework transforms untapped data into decisive action, leveraging AI and ML techniques to extract relevant information from all kinds of vital documents, images, forms, video files, and more.

- ML Services Competency
- Security Services Competency
- Data & Analytics Services Competency

**Scanned Documents**

- Invoices
- Loan applications
- Transaction records
- Insurance claims
- Know Your Customer (KYC)
- Balance sheets
- Bank statements
- Tax returns

## Solution Benefits

<p> <b>INCREASED DATA ACCURACY</b> Process documents faster and more accurately, reducing errors caused from manual entry</p>	<p> <b>FASTER DATA PROCESSING</b> Accomplish a weeks or months worth of work in a matter of days and enable employees to spend time on value-adding tasks</p>
<p> <b>IMPROVED CUSTOMER EXPERIENCE</b> Simplify the internal review process and reduce customer turnaround times</p>	<p> <b>LOWER OPERATIONAL COSTS</b> Automate document workflows and reduce complexity of paper-based records</p>

## Let's Meet
