Hands-On Look at VMware vRealize Network Insight Thursday at 11:00AM ET

A _free_ NSX network assessment to help customers visualize datacenter traffic flow instantly with a more comprehensive analysis over 1-3 days.

VMware understands that traditional network management tools are inadequate for modern virtual networks. Administrators require tools that can cross both virtual and physical networks for fast troubleshooting, repair, and planning. This need is what VMware vRealize Network Insight (vRNI) aims to solve.
