Strengthen Your Security with Innovative Cybersecurity Solutions

Now you can unleash the true power of an Enterprise License Model

This first-of-its-kind licensing alignment gives customers access to a unique licensing model with government and education-specific pricing and discounts.

Experience the power of industry-leading cybersecurity solutions with customer support and enablement provided by Carahsoft and its partners so your organization gets the most out of your solutions.

Symantec Endpoint Security Complete

Comprehensive endpoint cybersecurity suite designed to protect individual devices within a network from malware, sophisticated threats and targeted attacks.

Symantec Web Protection

Comprehensive security suite that offers on-premises and cloud-based web gateway (SWG) services, protecting organizations across the web, social media, applications and mobile networks.

Symantec Data Loss Prevention

Data Loss Prevention (DLP) solution that helps organizations identify, monitor and protect sensitive data to mitigate data breach and compliance risks.

Symantec Data Security Posture Management

Data Security Posture Management (DSPM) helps organizations discover, classify and assess sensitive data risk while improving visibility and strengthening DLP-driven data security strategies.

Carbon Black Workload

Cloud-based solution designed to protect virtualized and cloud-based workloads by providing comprehensive security features like vulnerability assessment, threat detection, prevention and response capabilities, all within a single platform.

Carbon Black Endpoint

Endpoint protection solution that offers advanced threat detection and response capabilities by continuously monitoring endpoint activity on devices within an organization, allowing security teams to identify and respond to potential malicious behavior in real-time.

Carbon Black EDR

Incident and response solution that provides continuous visibility into endpoint activity by recording and storing detailed data from devices so security teams can proactively hunt for threats and visualize the complete attack kill chain.

Symantec CBX

Cybersecurity platform that delivers undeniable prevention, reliable detections, native data correlation, holistic attack visualizations and prioritized alerting with out-of-the-box configurations to enable faster time to value and scalable security operations.
