Data Protection in the Modern Day

October is **Cybersecurity Awareness Month** and it is crucial to take a proactive stance on protecting your data. This year, it is time to focus on understanding the evolving threats and the measures we can implement to safeguard our information. Ready to protect your data like never before?

Learn More

In today's landscape, data exfiltration can happen in countless ways making a comprehensive zero trust approach essential. By implementing strategies like steganography detection, data tagging and robust access controls, you can fortify your defenses. Combining [BlueVoyant's](#) complete supply chain defense with [Forcepoint's](#) Data Security Posture Management and [Everfox's](#) Content Disarm and Reconstruction solution establishes a strong cybersecurity framework that tackles the diverse challenges organizations encounter today. This all-encompassing strategy not only protects sensitive information but also strengthens operational resilience.

[Explore](#) how to secure your organization with this essential bundle!

As organizations migrate to the cloud, tracking sensitive data becomes increasingly challenging. [Forcepoint](#) Data Security Posture Management (DSPM) meets these challenges by providing comprehensive visibility across cloud and on-premise storage, leveraging AI for better data discovery and classification.

To tackle the challenges of evolving cyber threats, diverse file types and increased attack services, implementing a strong Content Disarm and Reconstruction (CDR) solution with [Everfox](#) is essential. CDR effectively handles various file formats while providing proactive protection against malware and exploits.

With [BlueVoyant's](#) full supply chain defense, you can ensure that your data remains secure even when working with third party contractors. Cyber resilience allows organizations to maintain operations during incidents and ensure organizational continuity.

[Reach out to explore](#) this essential bundle to safeguard your data!
