Accelerate audit, risk, and compliance with Optro AI

Work faster and smarter with AI-powered insights and intelligent recommendations to augment your capabilities and business impact.

													

Generative AI

Audit, risk, and compliance practitioners spend thousands of hours per year crafting content and policy language to define the risk posture of their organization. Generative AI gives our users a starting point in generating risk and issue statements, control descriptions, test procedures, audit executive summaries, and much more.

Intelligent recommendations

Your teams rely on data, but drawing connections and identifying trends is time-consuming. Intelligent Recommendations, our purpose-built machine learning algorithms, work to connect frameworks to controls and requirements to issues, helping you leverage your data while saving time.

Strengthen your workflows with the power of AI

AI

Purpose-built AI solutions that streamline, automate, and improve the accuracy of your core audit, risk, and compliance use cases.

Boost efficiency across your GRC program

Generate risks, controls, and issues in minutes using contextual prompts and built-in expertise. Quickly create audit summaries, test procedures, and work steps to reduce manual effort and improve consistency. Optro AI helps your team move faster, focus on high-value tasks, and maintain a clear record across all stages of the process.

Map requirements and manage change at scale

Intelligent recommendations help you map controls to frameworks, identify duplicate issues, and uncover trends across your environment. As requirements evolve, the system highlights impacted controls and potential compliance gaps so your team can stay ahead and reduce manual effort.

Scale audit resourcing with intelligence

Quickly assign auditors based on skills, certifications, availability, and experience. Track team progress, support stakeholder reporting, and stay aligned with IIA standards while improving audit coverage and efficiency.

The screenshot shows a 'Create new risk' form. It has fields for 'Name', 'Category', and 'Description'. The 'Description' field is highlighted with a purple border and contains a 'SHORTEN' button. Below the form, there is a section titled 'Shortened description' with a purple border and a 'Use description' button.

The screenshot shows a 'Framework upload' form. It has a section for 'Controls' with a '56 SUGGESTIONS' button. Below this, there is a section titled 'Recommended existing controls' with a purple border and an 'Accept control mappings' button.

The screenshot shows a 'Project Staffing: IT Audit' form. It has a 'Team' section with a 'SELECT USER' dropdown menu. The dropdown menu shows a list of users: 'MARI' (marked as 'Recommended'), 'AARON', and 'DEBORAH'. Below the team section, there is a profile card for 'Mari', Sr. Audit Manager, with tags for 'REGULATORY COMPLIANCE', 'SOX', 'HIPAA', and 'IT SECURITY'. At the bottom, there is an 'Assign resource' button with a cursor pointing to it, and a 'Director IA' label.
