GROUND INTELLIGENCE

See every road. Know every risk.
Fix what matters most.

Continuous, network-wide visibility across your jurisdiction to prioritize the right repairs, deploy crews with confidence, and manage roads proactively.

Roads are your most visible public asset, and now you can manage them that way. Ground Intelligence provides a continuously updated picture of road conditions across your entire jurisdiction. Built on Samsara's network of millions of vehicles, it turns every vehicle already on your roads into a source of real-time infrastructure data.

Protect your community and your agency

Identify high-risk conditions before they cause accidents or costly claims.
Act on what matters, not just what gets reported.

Get more done with the crews you have

Replace manual scouting with remote verification so crews spend their days
fixing road conditions, not searching for them.

Protect the life of your roads and budget

Catch defects early before they result in injury or more costly repairs.
Extend road life, limit liability, and extend taxpayer dollars.

Prioritize the work that matters most

Continuously updated detections across your jurisdiction

- Build data-driven maintenance plans and dispatch crews with the right materials before anyone leaves the yard
- Track conditions over time to confirm repairs held or escalate to larger infrastructure projects
- Connect road condition data to existing work order workflows
- Improve service times to increase public trust and citizen satisfaction

Respond to every road condition with confidence

Ground-level visibility across your entire jurisdiction

- Verify citizen reports, storm damage, and field conditions before dispatching a crew
- Review on-the-ground context to prioritize the most critical needs and make informed dispatch decisions
- Quickly assess post-storm road conditions in real-time, without sending a single crew member out to look

Powered by the Samsara network

The world's largest connected operations dataset

- Millions of Samsara-equipped vehicles driving your roads
- 99% of major US roads traveled annually
- Continuous data updates from day one

“Samsara’s new Road Condition Visibility tool gives us more eyes, arms, and legs on the road when we’re stretched thin. As stewards of the road and taxpayer dollars, we have a responsibility to be both effective and fiscally responsible, and Samsara helps us do both for our constituents.”

RUSTY MCCLAIN

ASSISTANT OPERATIONS DIRECTOR,
ROAD COMMISSION OF KALAMAZOO COUNTY, MI
