Adobe Connect
Go Beyond Web Conferencing

Adobe Connect Solutions

Training
Adobe Connect enables instructors and enablement teams to create custom learning experiences that blend synchronous and asynchronous learning. Virtual classrooms in Adobe Connect foster interactivity through game-based learning, quizzes, polls, and more. Breakout rooms enable small teams to work simultaneously on separate content, while layouts in Adobe Connect provide structure for a learning experience.

Webinars
Adobe Connect goes beyond screensharing and chat to provide more engaging experiences with interactive content, smarter Q&A, and support for media including live and pre-recorded video, music, games, polls and more. Adobe Connect creates and hosts compelling microsites to help promote your events and register users, as well as robust analytics to measure engagement and provide insight into your webinars.

Meeting Rooms
Instead of scheduling a meeting in Adobe Connect, you create a persistent virtual space that can be customized with your own content, layouts, branding and URL. This flexibility enables rooms to be used for hundreds of real-time collaborative use cases including team meetings, war rooms, sales pitches, briefings, and much more.

Why Adobe Connect?

CUSTOM EXPERIENCES
Adobe Connect gives you complete control over the look and functionality of your virtual rooms. Hosts can create experiences that incorporate branding and content. Functionality is delivered via resizable pods. As a meeting host, you can position as many or as few of these pods on the screen at any time – enabling you to simultaneously share multiple screens or to use multiple chat pods for capturing feedback of varied topics.

LAYOUTS
Only Adobe Connect features layouts – pre-set groupings of pods that determine what is shown on the screen at any time. Layouts can also be customized by the host and are ideal for structuring a classroom or webinar. Layouts can also be used to optimize a single virtual room for multiple uses (i.e. meeting with finance, planning, operations).

CONTENT PERSISTENCE
Adobe Connect goes beyond letting you re-use a URL. The content inside your Adobe Connect room is also persistent. This makes it easy to re-use content like presentations, videos, polls, and more across multiple sessions – saving time and ensuring consistency. This persistence also enables you to set up your virtual environment days or weeks ahead of time.

ROOM TEMPLATES
A room template defines the look and feel of a new Adobe Connect room and can determine what content is pre-loaded in that room. Templates make it incredibly fast and easy to setup new rooms and ensure consistency across an organization. Room layouts can easily be reset back to the original template – making it easy to re-use your room.

POWER FEATURES
As a meeting host, you have access to unique power-features that let you work behind the scenes. Examples include the *Presenter Only Area* – enabling private collaboration with other hosts and presenters in the room, as well as *Prepare Mode* – enabling you to visit and setup different layouts without affecting the live meeting.

APPS
In the same way you can load an app onto your smartphone or tablet, you can load Adobe Connect custom apps into your Adobe Connect room. This enables you to extend the functionality of your room adding everything from fun ice-breakers and games to utilities like closed captioning.

Enterprise Excellence
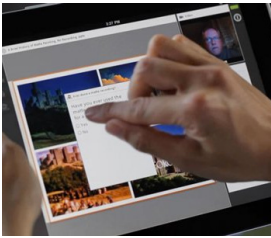

Choose your deployment
Adobe Connect has flexible deployment options designed to meet the needs of your organization.
- **Hosted** (Multi-Tenant): Adobe manages the software and updates - get started immediately.
- **Managed Service**: The benefits of an on-premise installation giving you complete control, but managed by Adobe.
- **On-Premise**: Deploy Adobe Connect on your hardware behind your firewall.

Customize your security and accessibility
Adobe Connect provides compliance and control options giving organizations granular control over permissions as well as functionality in meeting room — even providing white lists or black lists of which applications can be seen when screen sharing. Adobe Connect was FedRAMP certified by the Department of Homeland Security (DHS) and the Department of Defense (DoD). Adobe Connect also provides accessibility features in compliance with Section 508.
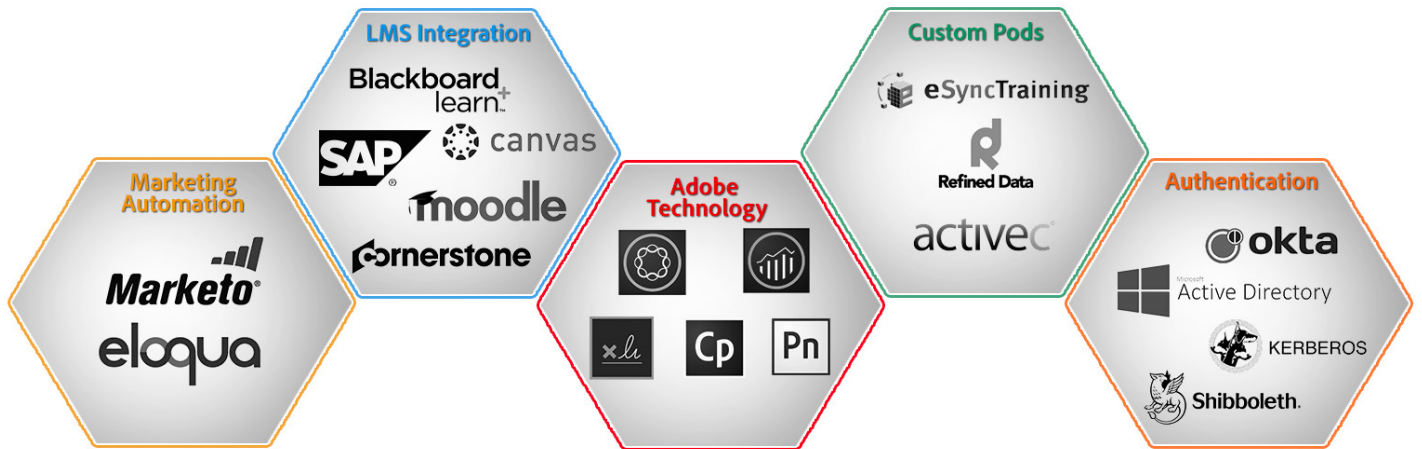

Enable enterprise mobility
Adobe Connect Mobile, available for iOS and Android devices, enables customers to not only attend and participate in Adobe Connect rooms, but actually host and present from those mobile devices.

Industry Standards

	AICPA	ISO 27001	HIPAA	FedRAMP
Hosted (Multi-Tenant):	SOC	ISO 27001 Certified		
Managed Service:	SOC	ISO 27001 Certified	(caduceus)	FedRAMP

Technology Integrations

Marketing Automation: Marketo, eloqua

LMS Integration: Blackboard learn+, SAP, canvas, moodle, Cornerstone

Adobe Technology: xli, Cp, Pn

Custom Pods: eSyncTraining, Refined Data, activec

Authentication: okta, Microsoft Active Directory, KERBEROS, Shibboleth.
