Compliance is essential. TRACER makes it easy.

Achieve and maintain an Authority to Operate (ATO) with the only Risk Management Framework platform tailor-made for secure, agile, and compliant Continuous Delivery

THE PROBLEM

Securing the average software ATO consumes 18 months, demands over \$2M in expenditures, and is stale upon granting.

It can take an estimated 4,200 workforce hours for companies to receive an ATO, with much of the effort due to manual review and transcription of documentation.

- M. Donkin, AWS GovCloud

THE TRACER SOLUTION

Introducing TRACER, an innovative tool that simplifies the ATO compliance process and reduces documentation, deployment, and enhancement timelines from months to minutes:

Streamlines Procedures - as a guide through NIST 800-53 controls with a focus on relevance by application

Creates Actionable Tasks - specific to your ticketing system

Automates Evidence Management - for the collection and organization of evidence to effortlessly prove compliance

Empowers Confidence - with the ability to demonstrate compliance efficiently

Simplify the RMF process by removing steps and complexity

Scale your compliance with reusable components. Know where they impact and implement with confidence.

Monitor your compliance system in real time and stay on top of what's needed when it's needed.

Stay current on your system compliance with real-time data at the individual scan and control level, ensuring you know exactly what is required and when.

Build scalable, iterable, agile software systems without sacrificing security and compliance.

1

Deliver secure applications faster

2

Focus on innovation, not paperwork

3

Address vulnerabilities as they emerge

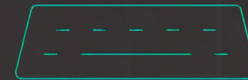

FOR EVERY STEP OF THE PROCESS

Tracer is built to address the entire RMF lifecycle so all users from developers and assessors through system managers and authorizing officials are considered.

- | Platform / application developers
- | Security control assessors
- | Information system security managers
- | Authorizing officials
