# AI-Powered SecOps Platform For Government

AI at its core. People where it counts.

Only AI can detect AI-based cyberattacks. Cerulean AI combines the power of an AI-powered SecOps platform with the human touch you trust. Our AI-powered SecOps platform is designed to quickly and accurately detect and respond cyber threats across your entire digital infrastructure and cloud, providing you with 24/7 monitoring, detection, and autonomous response. Cerulean AI custom fits to your organization, so you not only get the most innovative AI on the market, but you get the perfect fit, for your specific needs.

EVERYTHING YOU NEED: All-in-One AI Powered SecOps Platform

## THE AGILEBLUE DIFFERENCE

### Sapphire AI Insights

Sapphire AI alleviates strain on IT teams by using automation. Sapphire AI provides a holistic threat management system that includes managing threats and vulnerabilities, responding to security incidents, and automating security operations.

### Vulnerability Scanning

AgileBlue is partnered with industry leader Nodeware for integrated vulnerability scanning. VS allows us to identify all assets within a network and detect existing vulnerabilities.

### Dashboards & Reporting

AgileBlue's dashboards deliver automated, customizable KPI reporting with real-time updates, ensuring your data is always fresh, actionable, and tailored to your unique needs.

### Sapphire AI SOC Assistant

AgileBlue's Sapphire AI simplifies cybersecurity operations by automating routine tasks, detecting whether your server is under attack, and streamlining threat intelligence. This enables SOC analysts to concentrate on more complex investigations.

### 24/7 Incident Response

AgileBlue's 24/7 Incident Response delivers round-the-clock support. Powered by AI and backed by expert analysts, it ensures your organization is always prepared to respond to incidents with speed and precision.

### Integrated Threat Intel

Threat intelligence enables XDR to learn from attacks on other systems and use that information to detect similar events in your network.

### SIEM

AgileBlue's SIEM is an AI-driven solution designed to detect, analyze, and respond to cyber threats in real-time, offering unmatched visibility across your entire security landscape.

### XDR and EDR

AgileBlue's XDR combines data from EDR, SOC, SIEM, and SOAR for comprehensive threat analysis, baseline establishment, machine learning detection, and automated threat responses.

### Cyber Risk Scoring

AgileBlue's Cyber Risk Score instantly identifies vulnerabilities, actively exploiting threats to help you rigorously protect your business.
