

VPAT™

Voluntary Product Accessibility Template®

Version 1.3

The purpose of the **Voluntary Product Accessibility Template**, or **VPAT™**, is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial “Electronic and Information Technology” products and services with features that support accessibility. It is assumed and recommended that offerers will provide additional contact information to facilitate more detailed inquiries.

The first table of the Template provides a summary view of the Section 508 Standards. The subsequent tables provide more detailed views of each subsection. There are three columns in each table. Column one of the Summary Table describes the subsections of subparts B and C of the Standards. The second column describes the supporting features of the product or refers you to the corresponding detailed table, e.g., “equivalent facilitation.” The third column contains any additional remarks and explanations regarding the product. In the subsequent tables, the first column contains the lettered paragraphs of the subsections. The second column describes the supporting features of the product with regard to that paragraph. The third column contains any additional remarks and explanations regarding the product.

Date: December 11, 2014

Name of Product: Kofax Front Office Server 4.1

Section 1194.21 Software Applications and Operating Systems – Detail

VPAT™

Voluntary Product Accessibility Template®

<i>Criteria</i>	Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supports	All controls are accessible by keyboard (tab or shortcut keys). All production use controls provide text feedback.
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supports	Application does not disrupt or disable accessibility features of other software product or operating system.
(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supports	Cursor is easily identifiable at all times and is programmatically exposed to assistive technology. Control in focus is easily identifiable.

Contains CONFIDENTIAL AND PROPRIETARY INFORMATION, AND TRADE SECRETS of Kofax, Inc.
This information may not be disclosed without the express authorization of Kofax or its licensors. This product information is based on and provided for the limited purpose of conveying Kofax Software's or its licensors' understanding of the Section 508 Accessibility Standards. It may not be construed as product specifications for purposes of any warranty or conformance with product specifications in any contract or order.

<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p>	<p>Supports</p>	<p>All visually available information is available to assistive technology.</p> <p>All image, graph, icons and forms have descriptive information conveyed in some form of text (e.g. label, alt tag, or tool tips).</p> <p>MFP Emulator not supported.</p>
<p>(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.</p>	<p>Supports</p>	<p>All bitmap images present in the Application are used in a standard fashion.</p>
<p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p>	<p>Supports</p>	<p>Text information in the Application is available to assistive technology.</p> <p>Text is provided through operating system functions for displaying text.</p> <p>MFP Emulator not supported.</p>
<p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p>	<p>Supports</p>	<p>Application conforms to and does not override the user's operating system display settings.</p>
<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	<p>Supports</p>	<p>Text description can be used to replace any information conveyed through animation.</p> <p>MFP Emulator not supported.</p>
<p>(i) Color coding shall not be used as the only means of conveying information,</p>	<p>Supports</p>	<p>Application does not convey information</p>

Contains CONFIDENTIAL AND PROPRIETARY INFORMATION, AND TRADE SECRETS of Kofax, Inc.
This information may not be disclosed without the express authorization of Kofax or its licensors. This product information is based on and provided for the limited purpose of conveying Kofax Software's or its licensors' understanding of the Section 508 Accessibility Standards. It may not be construed as product specifications for purposes of any warranty or conformance with product specifications in any contract or order.

indicating an action, prompting a response, or distinguishing a visual element.		solely through the use of color.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Supports	Application allows for the adjustment of color and contrast settings.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Supports	Application does not contain any blinking objects with a blink rate between 1 Hz and 55 Hz.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supports	All forms in Application can be accessed through assistive technology. MFP Emulator not supported.

Section 1194.22 Web-based Internet information and applications – Detail

VPAT™

Voluntary Product Accessibility Template®

Criteria	Supporting Features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Supports with Exceptions	Application provides text equivalent for all non-text elements except for the exception noted below.

Contains CONFIDENTIAL AND PROPRIETARY INFORMATION, AND TRADE SECRETS of Kofax, Inc. This information may not be disclosed without the express authorization of Kofax or its licensors. This product information is based on and provided for the limited purpose of conveying Kofax Software's or its licensors' understanding of the Section 508 Accessibility Standards. It may not be construed as product specifications for purposes of any warranty or conformance with product specifications in any contract or order.

		There is no text equivalent for the Kofax Logo in the KFS Thin Client.
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not Applicable	Application does not contain multimedia presentations.
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supports	All information can be conveyed without the use of color.
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Supports with Exceptions	All information are readable without the use of style sheets except table setting icons.
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not Applicable	Application does not have any server-side image map.
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not Applicable	Application does not have any client-side image map.
(g) Row and column headers shall be identified for data tables.	Supports with Exceptions	Data tables contain meaningful row and column headers that are properly associated with the data. JAWS cannot identify headers for each data cell.
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not Applicable	Application does not contain complex data tables.
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not Applicable	There are no html frames in Application.

Contains CONFIDENTIAL AND PROPRIETARY INFORMATION, AND TRADE SECRETS of Kofax, Inc.
This information may not be disclosed without the express authorization of Kofax or its licensors. This product information is based on and provided for the limited purpose of conveying Kofax Software's or its licensors' understanding of the Section 508 Accessibility Standards. It may not be construed as product specifications for purposes of any warranty or conformance with product specifications in any contract or order.

<p>(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.</p>	<p>Supports</p>	<p>Application does not contain any blinking objects with a blink rate between 1 Hz and 55 Hz.</p>
<p>(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.</p>	<p>Not Applicable</p>	<p>Application revolves around scanning, viewing, and interpretation of images, and thus it cannot be implemented with a text-only version.</p>
<p>(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.</p>	<p>Supports with Exceptions</p>	<p>Validation error alerts are not read by assistive technology unless the user clicks on the alert</p> <p>Check boxes in tables are not associated with table information</p> <p>Certain buttons in the KFS Thin Client are identified as 'Button' by assistive technology</p>
<p>(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).</p>	<p>Not Applicable</p>	<p>Application does not require an applet, plugin, or other application to display page content.</p>
<p>(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.</p>	<p>Supports</p>	<p>All forms in the Application can be completed with the use of assistive technology.</p>
<p>(o) A method shall be provided that permits users to skip repetitive navigation links.</p>	<p>Not Applicable</p>	<p>Application does not have links that would</p>
