

# DOD-IC STAYS AHEAD OF ADVERSARIES WITH FIREEYE

The FireEye Advanced Intelligence Access service provides DOD-IC with immediate access to raw global threat data and the FireEye Mandiant intelligence database. A dedicated FireEye Intelligence Integrator delivers customized intelligence and analysis for decision makers and frontline defenders. This intelligence expert is exclusively dedicated to the client and has full access to FireEye intelligence holdings, expertise and tools.

**Figure 1.** With Advanced Intelligence Access, organizations can harness the full power of FireEye data, knowledge and expertise.

**Figure 2.** FireEye Intelligence Integrators at U.S. Government Clients.

## GROWTH DRIVERS AND USE CASES

### Informing Policy Makers

- Cyber security strategy and policy development
- Response and recovery planning
- Exposure analysis (attack surface analysis, adversary and organization overlap)
- Threat and risk communication (situation awareness, information sharing)

### Security Operations and Control Enhancement

- Vulnerability management (red teaming, patch prioritization, etc.)
- Security controls (planning, testing, deployment, configuration)
- Incident mitigation and recovery (likely courses of action, attribution, damage assessment)
- Security monitoring (indicator enrichment, log correlation, testing)
- Threat detection (signature development, hunting)
- Insider threat investigation and mitigation

### DOD-IC RAPID RATE OF ADOPTION

- U.S. DOD Combatant Commands
- U.S. Intelligence Agencies
- U.S. DOD Component Commands
- U.S. DOD Law Enforcement Entities
- IGO Military Alliances
