

# Texas Risk and Authorization Management Program Certification

The information below is provided as a companion to the TX-RAMP Certification.

## Cloud Service Name

Anthropic: Claude

## Cloud Service Provider URL

<https://trust.anthropic.com/>

## Cloud Service Description (200 words or less)

### Claude for Enterprise

> A managed software-as-a-service deployment of the Claude AI assistant for organizational end users, accessed via web browser, native desktop application, and command-line interface (Claude Code). The service provides conversational AI, document analysis, and code assistance with enterprise administrative controls including SAML/OIDC single sign-on, SCIM user provisioning, role-based permissions, audit logging, and configurable data retention. Hosted within Anthropic's SOC 2 Type II-assessed production environment; customer data is logically isolated per organization and is not used for model training.

### Claude Developer Platform (API)

> A cloud-hosted application programming interface that provides authenticated programmatic access to Anthropic's Claude large language models. Customers submit text and file inputs over HTTPS and receive model-generated responses for use within their own applications. The service includes the Anthropic Console for API key management, usage monitoring, and organizational access controls. All processing occurs within Anthropic's SOC 2 Type II-assessed production environment; customer prompts and outputs are not used to train models by default.

## Certification Status

Level 2

### Certificate Granted

04/09/2026

### Certification Expiration

04/08/2029

### Certificate ID

TX1880972
