

DRP: Scan and Protect

Detect and eliminate cyber threats before they impact your business and its customers.

Solution Brief

DRP: Scan and Protect

Detect and eliminate cyber threats before they impact your business and its customers.

Security teams are inundated as the cyber threat landscape rapidly evolves. These attacks are more sophisticated than ever with more organizations being targeted. The security information due to the amount of data and a lack of visibility into emerging threats. A flexible and scalable solution is needed to the efficacy of endpoint protection leaves your organization vulnerable to attacks – and hackers are being sophisticated in your defenses.

Businesses that fail to address vulnerabilities and address existing risks could face penalties on the dollar and reputational damage to the bottom line and to customer trust. The resulting data breaches imposed by global regulators, CSOs need a fix.

BlueVoyant's Scan and Protect is a cloud-to-end-to-end endpoint cyber threat detection and remediation solution that quickly scans and identifies all of the data. Our solution enables you to work with visibility into the entire network, including all endpoints, servers, and cloud services. It provides a comprehensive view of all data, provides a comprehensive view of all data, provides a comprehensive view of all data, and more. BlueVoyant identifies and prioritizes threats targeting the organization, providing actionable countermeasures to address threats to your brand, employees, and customers. Our report cyber threat analysis are always accessible to both customer and business leadership of planning, operations, risk, compliance, social media, and incident response.

Key Differentiators

- Unmatched, comprehensive data source including DNS logs, logs, threat intelligence, personally identifiable information (PII) breach data, and exclusive cybercrime forums.
- Under 24-hour pricing between capabilities leveraging real-time threat data with domain registration.
- Automated alerts, threat prioritization, and continuous monitoring to keep track of your cyber threat landscape.
- Fully automated product that can be deployed out of the box, backed by expert analysts designed to assist you.
- Instant, actionable alerts generated when sensitive data is exposed to threat being shared in public forums.

Thank you for downloading this BlueVoyant solution brief. Carahsoft is the vendor, reseller, and OMG-Vendor for BlueVoyant solutions available via NASA SEWP V, ITES-SW2, NASPO ValuePoint, OMNIA, and other contract vehicles.

Solution Brief

DRP: Scan and Protect

Detect and eliminate cyber threats before they impact your business and its customers.

Security teams are inundated as the cyber threat landscape rapidly evolves. Threat actors are more sophisticated than ever while many organizations struggle to plug holes in their security infrastructure due to resource constraints and a lack of visibility into emerging threats. A reactive security posture relying on the efficacy of endpoint protection leaves your organization vulnerable to attacks – and hackers are lining up to poke holes in your defenses.

Between the rise of the remote workforce, advanced phishing kits sold for pennies on the dollar and deployed by novice hackers, not to mention the mounting data privacy fines imposed by global regulators, CISOs need a lifeline.

BlueVoyant DRP: Scan and Protect is an end-to-end automated cyber threat detection and remediation platform that security teams can deploy out of the box. Our solution equips your team with visibility beyond the perimeter, continuously monitoring exclusive threat data sources – including proprietary global DNS data sets, private cybercriminal instant messaging channels, and more. BlueVoyant identifies and validates threats targeting the organization, providing actionable countermeasures to eliminate threats to your brand, employees, and customers. Our expert cyber threat analysts are always accessible to add context and facilitate takedowns of phishing sites, domain lookalikes, social media impersonations, and fraudulent apps.

Key Differentiators

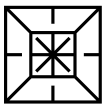

- Unmatched, comprehensive data sources including DNS data sets, instant messaging channels, Personally Identifiable Information (PII) breach data, and exclusive cybercrime forums.
- Unlimited 24-hour phishing takedown capabilities leveraging exclusive partnerships with domain registrars.
- Automated alerts, threat prioritization, and continuous monitoring supported by our cyber threat analyst team.
- Fully automated product that can be deployed out of the box, backed by expert analysts assigned to each client.
- Instant, actionable alerts generated when corporate data is exposed or found being shared in cybercrime forums.

BlueVoyant

Features

Web Impersonation

Proactive detection and unlimited takedowns of phishing websites and look-a-like domains.

Fraud Campaign Discovery

Monitoring of underground communities across various communication platforms for fraudulent activity, leaked payment cards and other confidential information.

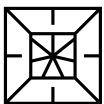

Social Media Impersonation

Proactive detection and unlimited removal of impersonating social media entities on Facebook, Twitter, Instagram & LinkedIn.

Account Takeover Monitoring

Identification of exposed credentials in order to reduce risk and limit the consequences of breached data.

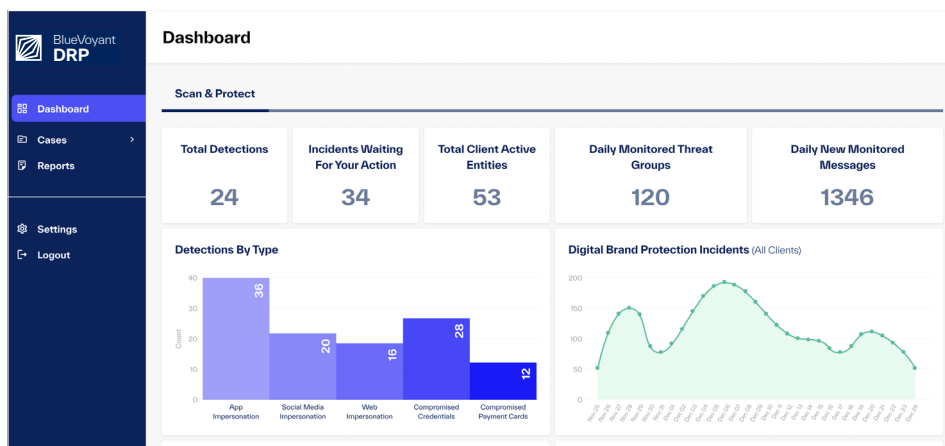

App Impersonation

Proactive detection and unlimited removal of rogue mobile applications from more than 300 official and unofficial app-stores.

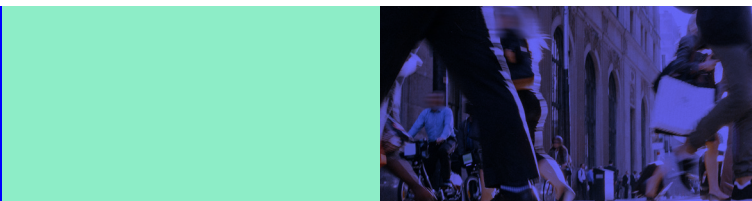

Data Leakage Detection

Identification of leaked corporate data or customer PII that can be used to infiltrate corporate networks or commit fraud against end users.
