Database Security & Regulatory Compliance Made Simple

Seamless Integration with Microsoft Azure & Active Directory

The Heimdall Database Access Gateway delivers unmatched security through Privileged Access Management (PAM) for your databases, eliminating security gaps & compliance risks.

40%

of CISOs identified sensitive data exposure within databases as a significant security concern¹

66%

of CISOs in the U.S. highlighted human error including user management issues as the top vulnerability¹

80%

of CISOs reported insufficient funding for robust security measures, leaving critical vulnerabilities exposed¹

Heimdall's Access Gateway delivers a more secure approach

PAM for Databases

- Centralization of Authentication and Authorization to Active Directory
- One-click user access reports
- Just-in-Time provisioning

Enhanced Security

- Data masking
- Query filtering

No-Code Deployment

- No application changes required
- Deploy in minutes

Protect your databases with the Heimdall Database Access Gateway

Problems We Solve

Lack of visibility and control of database user access

- Security gaps expose sensitive data to risks and regulatory penalties
- User management systems burdens IT teams with manual processes and inconsistent access controls
- Database SoD (Segregation of Duties) governance

Our Solution

Get Rid of Database Security & Compliance Risks

- **Regulatory Compliance:** Active Directory enforcement, just-in-time access, and detailed audit trails to ensure SOX, SOC2, FINRA, HIPAA compliance.
- **User Access Visibility:** One-click reports of users who “can” have access down to the database column level.
- **Simplified Management:** Web-based portal streamlines role administration, approvals, and reporting.
- **Multi-cloud Kerberos/Domain Compatibility**

Seamless Integration with Google Cloud

Built to thrive in the Google ecosystem

LDAP Synergy

Leverages LDAP for seamless authentication and authorization. Sync user roles at runtime, enforce group-based access, and generate one-click compliance reports—all while reducing IT overhead.

Supercharge Cloud SQL and AlloyDB

Adds a powerful layer of database security and control to ensure compliance and stop breaches in their tracks.

Dell Inc.

Background

Corporate wide mandate for all applications to leverage Dell's Active Directory.

Problem

Databases did not interoperate with Active Directory.

Solution

Heimdall Database Access Gateway centralized authentication and authorization for database users

Result

- Fulfilled SoD governance, SOX and SOC 2 compliance.
- Increased efficiency by implementing an approval-chain workflow for user data access
