

Public Sector Agency IT Service Management Checklist

When modernizing your IT infrastructure, it's important to ensure your new IT Service Management (ITSM) solution can adapt to your agency's requirements.

GET TO KNOW SERVICE MANAGER

7 Essential Requirements Modern ITSM Solutions Should Meet:

Automated and pre-configured workflows

Support for context-based IT and non-IT-related service requirements

Scalable cloud and on-premises deployment options, accessible anywhere via browser

Options for named and concurrent user licensing – Subscription or Perpetual

Configuration and upgrade processes that are flexible and easy to perform

Options for technology expansion, such as voice automation and AI-powered chatbots

Integration points and connectors for various operational systems

Modern Service Management for Your Government Agency

With Ivanti® Service Manager, government agencies benefit from innovation while realizing cost advantage – hitting targets for budget and productivity.
