As federal agencies push forward with cloud adoption to modernize their operations, they are met with rising challenges in managing complex environments and defending against advanced cloud threats. Our mission is to help make that transition secure and effective by reducing risk, protecting critical data and supporting mission success.

In support of that mission, we have partnered with the U.S. General Services Administration (GSA) OneGov to make Tenable Cloud Security FedRAMP available to all U.S. federal agencies at a 65% discount.

This partnership aligns with GSA's OneGov Strategy, which draws on the federal government's collective buying power to secure significant savings while promoting consistent security standards and easier access. It gives federal agencies a cost-effective way to protect their cloud infrastructure, advance modernization efforts securely and meet federal cybersecurity requirements.

Tenable Products offered as part of the Promotion:
