## RePath: Tools to Provide Insightful Decisions

**Do you feel confined  
by the limited set of  
tools available?**

Choices can be difficult; incarceration, ankle monitoring, or "nothing." Suppose you had a program that bridges the gap between ankle monitoring and "nothing"?

RePath is a program that includes a participant accountability app that we place onto a participant's own smartphone.

**Judges receive insights into the behavior of those on release or diversion with automated reporting.**

- Assurances that participants are complying with the order or terms of the agreement.
- Time-consuming tasks are reduced or eliminated with automation.
- Data-driven evidence provided in real-time.
