

2F Game Warden | carahsoft.

Why Choose Game Warden?

Rapidly Secure and Accredit Your Solution with Game Warden

Game Warden is an accredited DevSecOps platform accelerating software delivery to the government. We provide a streamlined accreditation pipeline paired with a fully managed hosting environment for organizations developing software to meet public sector standards from day one.

~ 90 Days

To accredit and deploy applications for government network use.

40+ Solutions

In production across all DoD Impact Levels.

Benefits

Inherited Authority to Operate (ATO)

Operate continuously in production on government networks, including TOP SECRET.

Compliant Across Leading Standards

Your data is in safe hands with our DOD IL2 - IL6, JWICS and FedRamp® High In-Process authorizations.

Rapid Accreditation

Speed your accreditation with our dedicated customer success team, a technical review, environment buildout, and ongoing day 2 operations.

24/7 Alerting and Monitoring

Ensure health and uptime status through continuous monitoring and logging.

Google Public Sector ATO Accelerator for ISV Partners

To mitigate challenges and support the ISV ecosystem, Google Public Sector and Carahsoft, a Google Cloud Distribution Partner, have launched an ATO accelerator. ISVs building on Google Cloud currently benefit from Google Cloud's robust compliance posture as a strong foundation for their government solutions.

The ATO accelerator initiative provides qualified ISVs with Google Cloud credits to build and test solutions against FedRAMP and impact level (IL) certifications. Google Public Sector will also provide resources and subject matter experts to help ISVs manage their GCP credits, and provide guidance throughout the testing and certification process.

Trusted By

Leading commercial organizations and government agencies trust 2F to secure mission critical solutions.
