

The Department of Defense (DoD) is mostly still using Waterfall software methodologies with software delivery every **3 to 10** years, making it impossible to keep up with the pace of technology.

The DoD Authority to Operate (ATO) process to accredit software takes on average 8 months and is mostly manual with several testing and cybersecurity gates.

Time to...Level Up and GitGoing

Increase Operational Efficiencies

- Lower TCO
- Eliminate bottlenecks
- Improve developer productivity

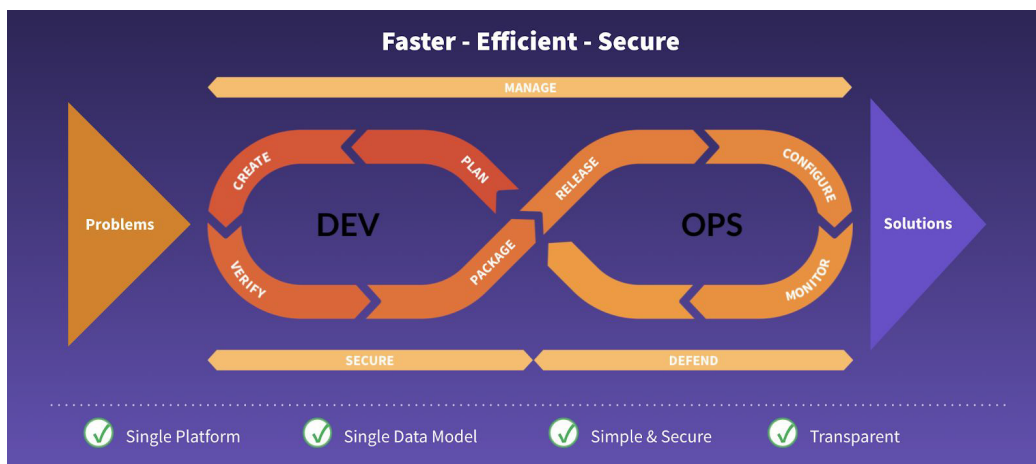

Deliver Better Products Faster

- Enable seamless collaboration
- Streamline processes
- Enable visibility across the entire software development lifecycle

Reduce Security & Compliance Risk

- Stay on time and on budget
- Comply consistently with policy
- Reduce security exposure

GitLab is a complete DevOps platform, delivered as a single application, fundamentally changing the way Development, Security, and Ops teams collaborate. GitLab helps teams accelerate software delivery from weeks to minutes, reduce development costs, and reduce the risk of application vulnerabilities while increasing developer productivity. This makes the software lifecycle 200% times faster, radically improving the speed to build and deploy mission-critical applications.

Our Customers Use GitLab to

- Create, manage and protect source code (Source Code Management - SCM)
- Increase the quality of code while decreasing time to delivery
- Accelerate the build and release process and empower developers to automatically deploy code (Continuous Integration/Continuous Delivery - CI/CD)
- Test for application security vulnerabilities early in the app development lifecycle
- Implement a better way to manage projects using Agile methodology
- Simplify DevOps and manage the entire DevOps/DevSecOps lifecycle more efficiently, with better outcomes
- Employ modern, cloud-native approaches to application development
- Automatically provision, administer, and maintain infrastructure-as-code (CI/CD Infrastructure-as-code or GitOps)

What Industry & Analysts Say About GitLab

- 2020 [Forrester Report - Now Tech: Continuous Delivery and Release Automation](#)
- 2019 [Forrester Cloud-Native CI Tools - Leader](#)
- 2019 [Gartner Peer Insights Customers' Choice - Enterprise Agile Planning Tools](#)
- 2019 [IDC Innovators: Tools Supporting Open \(Unopinionated\) Developer Platforms](#)
- 2018 [G2 Crowd Leader](#)
- 2017 [Forrester CI Wave - Leader](#)

Why Customers Choose GitLab

GitLab is leading the next advancement of DevOps. Built on Open Source, GitLab delivers new innovations and features on the same day of every month by leveraging contributions from a passionate, global community of thousands of developers and millions of users. Over 100,000 of the world's most demanding organizations trust GitLab to deliver great software at new speeds.
