

Zimperium

Privacy-Focused Mobile Security

Because state and local governments are responsible for a significant amount of critical infrastructure, such as utilities, schools and emergency services, they're a primary target for ransomware attacks. Beyond disrupting day-to-day functions, attacks can rack up millions of dollars in recovery costs and weaken critical systems. But with limited resources, protecting critical infrastructure from cyberattacks is a challenge. Zimperium provides industry-leading mobile security to protect organizations from mobile threats. Zimperium's [zIPS](#) uses machine learning to protect Android, iOS and Chromebook mobile devices against known and unknown threats to ensure that detection and protection outpaces evolving threats.

Company Overview

Founded upon the premise that mobile security requires an entirely novel approach, Zimperium secures both mobile devices and applications so they can safely and securely access data. Zimperium provides visibility and protection against known and zero-day threats and attacks across device, network, phishing, and application threat vectors. Headquartered in Dallas, Texas, Zimperium is backed by Liberty Strategic Capital and SoftBank and was recognized on the [2022 Inc. 5000 list](#) as one of the fastest growing private companies. Find additional information or contact us at zimperium.com.

Zimperium's mobile threat defense (MTD) solution, zIPS, provides on-device security with machine learning-based protection for student, teacher, and administrator mobile devices, including Chromebooks. Zimperium's solution empowers IT administrators to have centralized threat visibility while ensuring end-user privacy.

Carahsoft and Zimperium work together to provide the most advanced mobile security and threat defense solutions for government and education organizations. Visit us in booth #423.
