

INDUSTRY BRIEF

Boomi for **Federal Government**

Modernize and Transform Federal IT With Low-Code Integration

FedRAMP Authorized

Boomi helps federal agencies modernize IT with a cloud-native unified platform that connects mission-critical legacy systems with best-of-breed cloud applications. Realize your Federal Cloud Computing Strategy (Cloud Smart) objectives with a fast, flexible integration platform trusted by more than 9,000 organizations around the world.

CONNECT ANY SYSTEM TO ACCELERATE AGENCY INNOVATION

While federal agencies are making real progress modernizing their IT landscape, integration remains a challenge. Outdated integration technologies and custom coding can't keep pace as agencies strive to deliver a connected government experience for citizens, personnel, suppliers and partner governmental entities.

With FedRAMP authorization, Boomi empowers agencies and federal systems integrators to connect any system quickly, flexibly, and at lower cost. Agencies can connect data silos and digitally transform operations in a trusted and secure environment that supports data quality, governance, and compliance, with scalability to handle the most demanding workloads. The intuitive UI, drag-and-drop mapping tools, and AI-powered configurations, coupled with support for commonly used data integration patterns, dramatically shorten development times and let IT deliver outcomes faster.

ACCELERATE CLOUD SMART ADOPTION

Boomi's low-code platform and prebuilt connectors speed integration development 2X or more across any environment — on-premises, private, or public cloud.

The speed and ease of integrations will help federal agencies reap the rewards of rapid Cloud Smart adoption.

Modern integration on the unified Boomi Platform provides governmental organizations greater transparency and cost-efficiency needed for high Federal Information Technology Acquisition Reform Act (FITARA) grades.

INNOVATE FOR CITIZENS AND PARTNERS

Integration is key to delivering innovative products and services for constituents – from citizen portals to mobile applications. Boomi lets agencies connect with other federal organizations, suppliers, and state and local governments to accelerate delivery of new services or solutions. With Boomi, agencies also have a great platform for integrating with AI systems and processing IoT data from the network edge.

CONSOLIDATE AND MIGRATE APPLICATIONS

As agencies rationalize application portfolios, Boomi ensures a smooth transition with reliable, real-time data exchange between the original and new target applications and databases. The secure and reliable integrations streamline processes and minimize complexity, so federal organizations can meet their IT and administrative goals.

IMPROVE CONSTITUENTS' EXPERIENCE

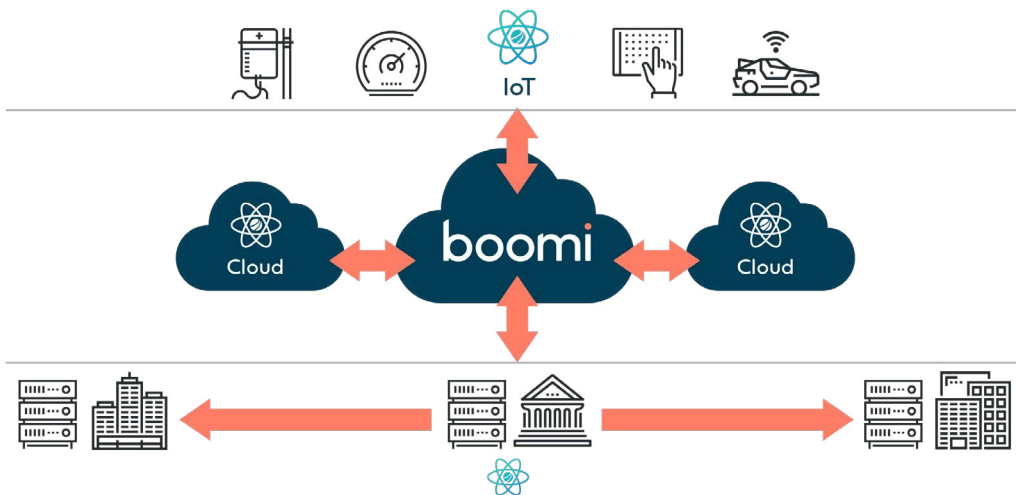

Unleash the power of your organization, tying together the data, knowledge, and people that ensure mission success.

Boomi lets agencies connect with other federal organizations, suppliers, and state and local governments for new digital services and increased efficiencies and productivity. Bring together workforce processes and workflows from across organizations to collaborate better and provide a streamlined approach to customer experience so constituents can access services easily.

ACHIEVE YOUR AGENCY'S MISSION OBJECTIVES WITH BOOMI

Federal leaders are focused on creating a more innovative, responsive, and transparent government. But there are obstacles on the digital transformation journey — tech debt, data sprawl, outdated technologies, and brittle connectivity. Bridging the gap between legacy systems and modern cloud apps is essential.

A close partner of the Dell EMC Federal organization, Boomi pioneered the cloud-native integration market. Our secure and proven technology, built over nearly two decades of market leadership, provides the integration agencies need to achieve their objectives.

INTEGRATION FLEXIBILITY FOR ANY USE CASE

Boomi's unified platform equips federal agencies to modernize any process, from employee management and procurement to records management and citizen engagement. With FedRAMP authorization, Boomi data integration and management capabilities include:

- **Boomi Integration:** Boomi scales to meet high-volume needs in real-time, mobile, batch (ETL) and EDI environments.
- **Boomi Master Data Hub:** Synchronize and ensure data quality, providing trusted information across all systems.
- **Boomi B2B/EDI Management:** Rapidly onboard trading partners and monitor all partner interactions in real-time through a centralized portal.

Why Boomi?

- 9,000+ global customers
- FedRAMP authorized
- Dell EMC Federal partner
- Carahsoft Federal partnership
- Gartner Enterprise iPaaS Magic Quadrant leader for 6 consecutive years
- 95% customer satisfaction and 97% renewal rate

Pure Cloud

- No hardware to install or maintain
- Automatic updates
- Predictable usage-based pricing
- Single-instance, multi-tenant cloud architecture
- Accessible from any browser

Robust Integration

- Proven connectivity to thousands of endpoints, including hundreds of applications
- Drag-and-drop integration development, no coding required
- Any-to-any integration across cloud and on-premises systems
- Intuitive, centralized integration management
- Community access to connectors, widgets and process maps
- Extensive crowd-sourced knowledge and guidance
