Benefits of Security Observability

Security integration for Hybrid Cloud Observability

This integration combines security-related events, metrics, and activities with the other data in Hybrid Cloud Observability. Some of the key benefits of this security integration include:

| Gain insights into the entire internal state of a complex distributed environment | Understand the security posture of the environment | Remove internal silos and have complete control | Reduce the time it takes to identify security issues |

Summary Dashboards From SEM, ARM, and More

Covers security-related events, metrics, and activities

Single-pane-of-glass solution designed to identify critical security issues

- Better understanding of the complexities within the environment

- Gain real-time visibility to help detect and remediate security issues

- View security events, firmware vulnerabilities, policy violations, risk assessments, and more in a single dashboard
