KEY BENEFITS

- **Agile management flexibility.** Tailored to accommodate the government's unique circumstances where agile methodologies vary and often hold diverse interpretations, even within the same organization.

- **Deliver capabilities faster.** The public expects value at the speed of need and on par with the pace of technology. Rally focuses government teams on what requirements matter most, reliably connecting work to organizational priorities and strategy.

- **Empower government teams to work efficiently and reduce waste.** Allow users to easily initiate, manage, and share work while accommodating changes in a timeframe that benefits the organization.

KEY FEATURES

- **Objectives and key results.** Associate work to outcomes that you define, whether they be agency, department, office, mission, or line of business related; easily track progress and visualize organizational alignment.

- **Real-time status tracking.** Track initiatives across all technical and functional teams, programs, and portfolios, specifically well suited for government's distributed work environments typically across disparate geographical locations.

- **Iteration and release planning.** Accommodate ever-changing priorities and plan to deliver on the most important ("highest value") mission and business initiatives.

- **Customizable dashboards.** View the information you need most regardless of your agile life cycle maturity with out-of-the-box templates including Scrum, Kanban, or custom views.

Rally® by Broadcom
Agile Management for Public Agencies

Overview

It's a fact. Putting Agile at the center of your organization will help you respond to change quickly and confidently, providing mission and business value. Rally® is the foundation to enterprise agility and well-suited for disparate and geographically distributed environment. With enterprise agility, you have speed and stability, improved role clarity, innovation, and operational discipline.

Rally empowers you to strategically plan, prioritize, manage, track, and continuously improve your work. This helps provide the necessary value that the organization requires, while also achieving the speed, quality, and efficiency that the public deserves. Our FedRAMP-authorized Agile management platform provides visibility into progress, roadblocks, and dependencies across multiple teams, projects, and programs. This allows you to align strategic goals to work, make better mission and business results, and do it all in a single system of record.

Business Challenges

Delivering results at the speed of need that are tightly aligned with mission and business value continues to be the benchmark for success. Traditional methods not tailored to the government's unique demands have proven to be too slow and expensive to keep up with the pace of a digital government and expectations of the public it serves.

Are you struggling to align your work to the mission and business strategy? Are you missing deadlines, milestones, and delivery dates? Do you have too much work in progress—working at maximum capacity—and still not delivering quickly? Are you creating unrealistic development roadmaps? Do you lack visibility into progress and risks before it is too late to act?

To overcome these challenges, successful government organizations rely on Rally. Rally enables agencies to deliver more customer value faster by synchronizing work to mission and business priorities, coordinating teams, providing visibility, and delivering with a predictable cadence. You can measure work across teams of teams with real-time visibility, while staying focused on the most important requirements, in a single, scalable, extensible source of truth.

KEY FEATURES, continued

- **Capacity planning.** Align business needs to team capacity to deliver customer value.

- **Risk management.** Surface blocks, defects, dependencies, and milestones to take prompt action for government's mission critical importance.

- **Scalable, secure platform.** Our secure, FedRAMP-authorized, stable, and extensible platform scales and integrates with popular apps and tools.

- **Reporting and metrics.** Simplified visibility into work left to be done, time to complete, and velocity, measure productivity, responsiveness, and quality.

- **Simple for teams, limited admin.** Empower teams with a faster, simpler way to begin, track, and navigate work without needing administrative support.
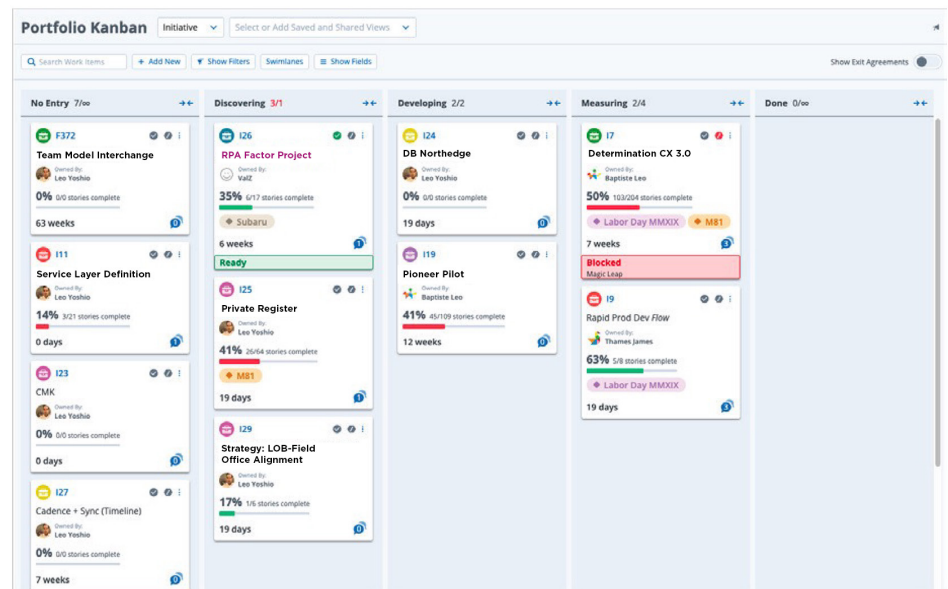

Solutions Overview

To drive organizational success and relieve technical and functional pain-points, you need to harness the power of Agile with Rally. Our tailorable, modular implementation facilitates building a fast, responsive, and reliable software delivery engine.

- **Realize efficiencies.** Eliminate bottlenecks and roadblocks with data-driven planning tools and real-time visibility into work in progress. Rally helps you plan and build the highest-priority features and deploy them without delay.

- **Connect strategy to delivery.** With our objectives and key results goal setting, Rally connects Agile teamwork to your organization's objectives—whether Agency Strategic Initiatives, Departmental goals, or line of business tactics—to deliver faster, optimize resources, and maximize return on investment. With Rally, you'll get mission and business visibility into delivery status to make informed portfolio-steering decisions.

- **Empower your teams.** Equip your organization with a predictable delivery engine by focusing your teams on the requirements that matter. Rally offers real-time visibility into status and performance metrics, empowering teams to improve continuously.

Critical Differentiators

Figure 1. Simple for Teams, Powerful for the Enterprise.

Rally

- **Intentionally built for speed and scale.** Whether deployed in a single-project implementation or supporting an entire Program Management Division, Rally is an enterprise-class platform capable of coordinating work across multiple teams and programs with large numbers of users and artifacts.

- **Empowers Agile teams.** Features like capacity planning, team planning, and release tracking bring the right work to the right teams at the right time. Team board, personalized navigation, and quick detail pages enable your teams to access the right level and complexity of work to deploy the most important requirements.

- **Offers dynamic performance metrics.** Benefit from the only platform that empowers you to measure productivity, predictability, quality, and responsiveness in real-time. Get the data to benchmark team performance and continuously improve it according to top KPIs.

- **Enables collaboration across tools, teams, and time zones.** Streamlined collaboration perfectly suited for the distributed organization and work of government organizations. Minimize task switching and communication breakdowns with threaded chat and a team inbox that aggregates email, feeds, and tool notifications all in one place—streamlining and simplifying data calls and "fire drills."

- **Features real-time, reliable progress status.** With the Investments feature, leadership can track initiative progress by team, work, time, and even funding.

- **Exceeds government-level security requirements.** Security of a FedRAMP-authorized solution provides a standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services and eliminates hidden costs with one solution.

- **Consistently rated as market leader** by analysts for our completeness of vision and our ability to execute.

Related Solutions

- **ValueOps.** Integrate Rally with Clarity to connect the work of Agile teams and programs to your organization's strategic portfolio. With ValueOps, you can scale Agile across the enterprise, providing development teams

- The autonomy required to drive innovation while maintaining the integrity of your portfolio dashboards across projects, products, and value streams. Deliver on investments, mission, and business objectives faster, with higher quality and predictable results.
