

VMware SD-WAN by VeloCloud: Hands-On Labs

Solution Components

VMware SD-WAN Edge

Virtual Edge

Flexibility in deployment

- Purpose-built hardware
- Virtual Edge for cloud or white box
- Services platform for VNF

For branch,
datacenter & cloud

VMware SD-WAN Orchestrator and Controllers

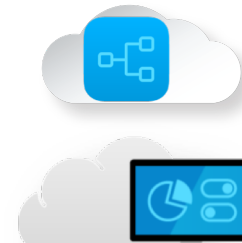

Multi-tenant cloud-based management, configuration, and monitoring portal

VMware or SP hosted, and on-premises at enterprise

Business policy abstraction

APIs

Enables fast deployment, zero-touch operations

VMware SD-WAN Gateways

Optimized cloud on-ramp to the doorstep of SaaS / IaaS

Fully managed and operated by VMware and SPs

Multi-tenant

Strategic world-wide locations, top-tier network PoPs

VeloCloud SDWAN Lab Options

HOL-2040-01-NET	VMware SD-WAN by VeloCloud - Getting Started	Explore VMware SD-WAN by VeloCloud including the key components and architecture.
HOL-2021-04-CMP	vRealize Orchestrator - Getting Started	Get started with VMware vRealize Orchestrator to simplify the automation of IT tasks. Explore the vRealize Orchestrator development environment and learn important introductory development concepts by building and testing basic workflows. Then put those workflows to use inside VMware vRealize Automation to create reusable processes.
SDWAN Advanced Lab	VMware SD-WAN by VeloCloud – Adv Enterprise Lab	Explore VMware SD-WAN by VeloCloud advanced configuration and architecture.
