

Web Performance Monitor

Quickly troubleshoot performance issues for both internal and customer-facing websites and web-based applications.

Download a free product trial and start monitoring your websites in minutes.

SolarWinds® Web Performance Monitor tracks user experience and tests transactions for internal and external web sites and web-based applications—from any location. Quickly identify the elements that are slow or failing, then troubleshoot down to the supporting infrastructure from web server, database, down to storage hardware.

WEB PERFORMANCE MONITOR AT A GLANCE

- » Know when users can't get to your site or web app, or are giving up because it's too slow
- » Track Web Service/SaaS application performance for both internal and external solutions
- » View website and infrastructure performance from a single view
- » Monitor user experience from multiple access locations
- » Automatically alert with configurable thresholds at each step of a transaction

FEATURES

Monitor Internal, SaaS-Based, and Customer-Facing Web Apps

Easily monitor Web applications such as CRM, supply chain, help desk, and more. Because Web Performance Monitor is installed within your firewall, you can securely monitor internal resources.

Easy-to-Use Transaction Recorder

Quickly and easily capture how a user interacts with your site or web app with our intuitive recorder—no scripting involved.

Application Stack Management Dashboard

When used with products like SolarWinds® Server and Application Monitor, you can map the relationship between a transaction or page to its supporting servers, databases, virtual infrastructure, and storage resources. This allows you to see the underlying components and their status.

Web-based Application Performance

With SolarWinds website monitoring software, you can quickly recognize if web services are causing a slow user experience in your third-party applications.

Detailed Load-Time Metrics

TCP waterfall charts quickly identify what page elements are taking the most time to load. You can monitor website elements such as HTML, CSS, JavaScript, as well as overall performance, and get notified for incomplete or slow transactions.

Monitor Transactions from Multiple Locations

Web Performance Monitor lets you monitor transactions from wherever you want, including locations within your firewall or from your Amazon® EC2® instances.

Transaction Alerting/Notifications

Set warnings and custom timing thresholds for individual steps and entire transactions. Get notified automatically when a transaction fails.

Website and Web App Performance Reporting

Web-based reports make it easy to generate quick reports on page load speeds, transaction health, website availability over time.

“ I was impressed that we were up and running within 30 minutes of downloading the software. I dare anyone to find a product that is as easy to install, set up, integrate, and get into production.

”

— Evan Marks,
Infrastructure Manager
at COCC

SYSTEM REQUIREMENTS

HARDWARE	MINIMUM REQUIREMENTS
CPU	Quad core processor or better
Memory	6GB
Hard Drive	20GB minimum
SOFTWARE	MINIMUM REQUIREMENTS
OS	Windows Server® 2016 or later
Database	<p>On-premises</p> <p>SolarWinds supports Express, Standard, or Enterprise versions of the following:</p> <ul style="list-style-type: none"> • SQL Server® 2014, 2014 SP1, 2014 SP2 • SQL Server 2016, 2016 SP1 • SQL Server 2017 (including installations on Linux®) • SQL Server 2019 <p>Cloud</p> <p>Amazon® RDS</p> <p>Azure® SQL database, Managed Instance</p>

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.

ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of powerful and affordable IT infrastructure management software. Our products give organizations worldwide, regardless of type, size, or IT infrastructure complexity, the power to monitor and manage the performance of their IT environments, whether on-prem, in the cloud, or in hybrid models. We continuously engage with all types of technology professionals—IT operations professionals, DevOps professionals, and managed service providers (MSPs)—to understand the challenges they face maintaining high-performing and highly available IT infrastructures. The insights we gain from engaging with them, in places like our THWACK® online community, allow us to build products that solve well-understood IT management challenges in ways that technology professionals want them solved. This focus on the user and commitment to excellence in end-to-end hybrid IT performance management has established SolarWinds as a worldwide leader in network management software and MSP solutions.
