ninjaone.com/platform

Do more with your existing IT resources.
NinjaOne makes your IT team more efficient and effective with easy-to-use tools and powerful cross-platform automations that minimize administrative burden.

Take control of your IT assets.
Monitor, maintain, and manage all your IT assets with powerful tools that put you in control of endpoint behavior and configuration.

Protect your endpoints from ransomware.
Get full visibility into your managed environments, automate vulnerability remediation, deploy next generation security tools, and backup critical business data all with NinjaOne.

Support end-users anywhere – on any network.
Manage assets on any network and provide support to users wherever you or they are – all without the need for a company network, domain, or on-premises server.

“On a daily basis, the Ninja Platform saves me so much time. If I had to dedicate time to patching, monitoring, backup, reporting, etcetera, I would not be able to focus on strategic projects like our business continuity plan and our cybersecurity strategy.”

Jesse A., Information Technology Officer

Why NinjaOne?

NinjaOne supports over 10,000 MSPs and IT departments around the world, and is consistently ranked #1 for its world-class customer support. NinjaOne has been recognized as the best rated software in its category on G2 and Gartner Digital Markets for the past 3 years.
