In today's rapidly evolving cyber landscape, organization's **lack the experience of a severe cyber-attack** until it happens in their environment, leading to untested team skills and inadequate defense mechanisms.

The SimSpace platform revolutionizes cybersecurity training with a powerful suite of tools designed to upskill both teams and individuals. Whether your defenders are just starting out or need advanced, application-based exercises, SimSpace meets them at their current skill level. Prepare your team to handle real-world scenarios with confidence, from foundational knowledge to cutting-edge techniques

81%

Of respondents do not feel their organization is adequately prepared to handle a severe cyber attack that happens in production.

Live Team Exercises

In a model of your organization's environment, teams can collaboratively respond to emulated threats in real-time.

Individual Training

Tailored, level-specific role-based courses that allow personnel to develop and refine their skills independently, ensuring a personalized progression path from foundational to expert levels.

Key Benefits of Training on SimSpace:

Realistic Environment Training: Train in an emulation that mirrors your organization's environment, ensuring that defenders handle real-world scenarios effectively.

Comprehensive Adversary Emulation: From recon to execution, experience full-spectrum adversary tactics, techniques, and procedures (TTPs) that challenge and refine your defense strategies.

Performance Metrics and Analytics: Leverage advanced analytics to gain clear insights into team performance, helping pinpoint areas for improvement and validating security controls.

Collaborative Learning and Benchmarking: Engage with industry peers to share best practices and benchmark your security posture, fostering a collaborative approach to cyber defense.

" Customer Spot

It's like having a cyber gym where our team can continuously train and improve their abilities in a real-world environment."

SimSpace Training Opportunities

Role Based Training

Build a robust foundation for every role in your cybersecurity defense. From red and blue teams to application security engineers, incident responders, SOC teams, forensic analysts, and threat hunters – we've got everyone covered
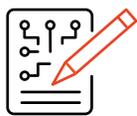

Team-Based Scenarios

Foster teamwork and apply practical skills through Purple Team training, Red vs. Blue competitions, and single team investigations.

Curriculum Design & Managed Training

Customize role-based training to fit your organization's unique needs, all managed directly by your team.

Content Authoring & Workforce Readiness

Create custom training content and prepare your workforce for both current and emerging threats with complete control of your users, their training and the results.
