

RedData (a division within RPI-CS, Inc.) is a one-stop shop for security enabled data storage devices and systems. We provide commercially viable solutions that support the mission and meet customer's security requirements, with a special focus on Commercial Solutions for Classified (CSfC) spaces. Our products portfolio includes a range of certified Self-Encrypting Drives (SEDs) from well-known manufacturers. Our services begin at the design phase working with the manufacturing base, incorporating additional hardware capabilities as needed, and adding firmware and software enablements that our users and customers require to make their devices and solutions secure.

We provide storage products, systems, and services, all with a rock-solid security posture that meet our customer's rigorous requirements. We source components and systems from approved regional fabrication facilities that have geopolitical alliances with the US, with protected and traceable supply chains. Services include US personnel, firmware verification, black-hole device replacements, on-site support, testing and validation.

RedData is part of RPI-CS, Inc. (RPI), a trusted, proven, and highly experienced professional services provider for commercial and public sector environments on the federal, state, and local levels. Engineers at RPI have an average of 20 years of expertise in architecture, integration, and maintenance of mission critical systems.

RPI is a Service-Disabled Veteran-Owned Small Business, California SB-#2003226.

PRODUCTS

- Self-Encrypting drives for data-at-rest security
- TAA compliant
- FIPS140 certified
- Common Criteria / NIAP evaluated
- CSfC approved components listed
- Direct relationship with manufacturers

SOLUTIONS

- Data-at-rest security for (tactical) endpoints
- Data-at-rest security for enterprise systems
- CSfC Data-at-Rest Capability Package conformant
- Centralized key management for storage
- Mission specific storage security
- Certifications, testing, onshoring, final-touch
- Supply chain security
- Bespoke secure storage architectures

PROGRAM MANAGEMENT

- Program management office
- Systems planning & research
- Proposal development (ECPs & price estimations)
- Pricing, quotes, and order fulfillment
