#BeCyberSmart

BUSINESS EMAIL COMPROMISE

is when threat actors use email fraud to attack an organization and its employees, customers or partners.

In the Cofense 2023
ANNUAL REPORT

10% we found
malicious emails
were BEC.

TO PROTECT YOUR COMPANY FROM BEC:

- ✓ Use secondary channels or multi-factor authentication.
- ✓ Ensure email URLs are legitimate.
- ✓ Do not send login credentials in response to an email.
- ✓ Verify the sender's email address.

OVER THE YEARS, BEC EVOLVED TO INCLUDE:

- ✓ Compromise of personal emails
- ✓ Compromise of vendor emails
- ✓ Spoofed lawyer email accounts
- ✓ Requests for W-2 information
- ✓ Fraudulent requests for large amounts of gift cards

According to the annual
2022 FBI INTERNET
CRIME REPORT
BEC phishing cost victims

\$2.7 BILLION
this past year alone.

Adopt a **COMPREHENSIVE PHISHING DEFENSE PROGRAM**
that empowers all your employees to act as the **first line of
defense against BEC scams**, including:

- ✓ A phishing simulation program
- ✓ A reporting tool that allows employees to flag phishing threats

With the rise of BEC,
NO SECURE EMAIL
GATEWAY is

100% EFFECTIVE
in blocking attacks.
