UNLOCKING THE POWER OF AI

TRAINING COURSES FOR
EXECUTIVE ORDER COMPLIANCE

TAG

carahsoft.

In light of the recent **White House Executive Order** on Artificial Intelligence, the need for comprehensive understanding of AI technology has never been more critical for Federal Agencies, State Government, and Local Municipalities.

The research and advisory team at New York City-based TAG Infosphere proudly presents a series of Tailored Training Courses designed specifically to meet the AI learning needs of US public sector departments and agencies.

Led by industry luminary, Dr. Edward Amoroso, CEO of TAG and esteemed Research Professor at New York University (NYU), these courses offer insightful coverage of three crucial domains outlined by the Executive Order:

COURSE 1: UNDERSTANDING THE FUNDAMENTALS OF AI TECHNOLOGY

Delve into the inner workings of AI technology with our comprehensive course. Learn the foundational principles behind AI algorithms, machine learning, neural networks, and more. Dr. Amoroso's expertise will guide participants through the intricate mechanisms that drive AI innovation, empowering them with the knowledge to harness its potential effectively. Case studies into the application of AI across business, government, and society are included.

COURSE 2: SECURING AI TECHNOLOGY AND USAGE:

With the proliferation of AI comes the need for robust security measures. Our specialized course explores the challenges and solutions in securing AI technology and its applications. Participants will gain insights into safeguarding AI systems against vulnerabilities, cyber threats, and unauthorized access. Dr. Amoroso's experience in cybersecurity ensures that participants are equipped with cutting-edge strategies to fortify their AI infrastructure.

COURSE 3: NAVIGATING POLICY-BASED IMPLICATIONS OF AI FOR FEDERAL AGENCIES:

As AI continues to shape the landscape of governance, it is essential for federal agency workers to grasp its policy implications. Our course offers a nuanced understanding of the regulatory frameworks, ethical considerations, and governance models surrounding AI deployment in the public sector. Dr. Amoroso's expertise in policy analysis provides participants with invaluable insights into navigating the complex intersection of AI and government mandates.

NAVIGATING THE AI LANDSCAPE

TAILORED SOLUTIONS FOR FEDERAL AGENCIES

At TAG Infosphere, we understand the unique requirements of federal agencies. That's why our training courses are meticulously tailored to address the specific needs and challenges faced by each agency. Whether you're a defense agency, healthcare provider, or regulatory body, our courses are customized to align with your organizational objectives and priorities.

VIRTUAL DELIVERY FOR CONVENIENCE AND FLEXIBILITY:

Recognizing the importance of accessibility, all our courses are delivered virtually, allowing participants to engage from anywhere in the world. With flexible scheduling options, agencies can seamlessly integrate training into their workflow without disruption. Each course is designed to maximize engagement and interaction, ensuring an immersive learning experience for all participants.

PROCUREMENT MADE SIMPLE

Procuring our training courses is hassle-free with our partnership with Carahsoft, a trusted government IT solutions provider. Through a contract with Carahsoft, federal agencies can easily acquire our courses to equip their workforce with the knowledge and skills needed to navigate the AI landscape effectively.

Equip your agency with the knowledge and expertise to harness the transformative power of AI. Contact TAG Infosphere today to learn more about our tailored training solutions for federal agencies. Together, let's pave the way for a future empowered by AI innovation.
