The First Salesforce DevSecOps Platform to be FedRAMP Authorized

Safeguard and scale digital transformation with the first end-to-end DevSecOps platform for Salesforce achieving FedRAMP Moderate authorization, sponsored by the Department of Veterans Affairs. Copado not only meets rigorous SaaS certification standards itself but also enables federal agencies to streamline their software delivery and cloud migrations with faster time to value, while maintaining top-tier security and compliance protocols.

CHALLENGE

Scaling Agile Development for Low-Code SaaS

Federal agencies are increasingly adopting Cloud/SaaS solutions, Low-Code platforms, and Agile delivery methods to meet demands for faster, more efficient delivery. However, standard DevSecOps solutions require customization and maintenance hence they fail to support these platforms adequately leading to manual process management, increased overhead, conflicts, inefficiencies, missed releases, project delays, and lost value. As teams and environments scale, maintaining quality, security, and governance becomes even more challenging.

SOLUTION

Scalable & Secure Release Management

Copado revolutionizes Salesforce development in the public sector with the first FedRAMP-authorized DevSecOps Platform, tailored for GovCloud and Public Sector Solutions. Partnering with SI's and customers across federal and state agencies, Copado ensures FedRAMP compliance through a robust CI/CD solution, streamlining software delivery and enabling rapid, high-quality feature releases. This platform simplifies complex deployments with a solid DevSecOps foundation, enhancing team coordination and scalability.

Copado Benefits

Faster Time to Deployment

Leverage Copado to reduce deployment times, deliver features to the business faster, and foster continuous integration and delivery.

Governance and Compliance

Simplify governance with streamlined release approvals, comprehensive audit trails, quality gates and real-time monitoring.

Security and Visibility

Ensure pipeline traceability and easy rollbacks, merge conflict resolution and metadata backups.

Accessibility for All Users

With a cloud-native UI, both pro-code developers and no-code admins find Copado user-friendly, promoting swift adoption and enhanced collaboration.

Copado GovCloud Scope for FedRAMP

COPADO FEATURES INCLUDED

- ✓ Copado Salesforce Metadata Pipelines
- ✓ Copado Data Deployer
- ✓ Copado Plan
- ✓ Copado Compliance Hub

COPADO FEATURES NOT INCLUDED

- ✗ Salesforce Source Format Pipelines
- ✗ Copado Robotic Testing
- ✗ Mulesoft Connector
- ✗ Copado Version Control
- ✗ Value Stream Mapping
- ✗ Copado Tunnel

Customer Insight

"Achieving FedRAMP authorization is a key competitive advantage in the marketplace and demonstrates a commitment to helping public sector agencies accelerate their digital transformation goals. Congratulations to Copado for achieving this important milestone."

Casey Coleman,
Senior Vice President, Global Government
Solutions for Salesforce

AVAILABLE INTEGRATIONS

- Agile Planning (JIRA, Azure DevOps, ServiceNow)
- Version Control Systems (GitHub, GitLab, ADO, BitBucket)
- Partner Integrations (Own, DigitSec, among others)
