

# Prepared 911 Flyer

## Brief Overview & Video

**PREPARED** 

### Prepared OnScene

*A new level of situational awareness in the field*

Panic and confusion during emergencies lead to poor 9-1-1 caller descriptions that cause field responders to enter murky, unknown situations. **By providing live video and other media from the caller**, Prepared OnScene helps lift the caller's burden of description and instead provides you, the responder, with greater **context, clarity, and certainty** as you step on-scene.

Your eyes-on-scene  
before your  
eyes are on scene

The diagram illustrates the emergency response process: **CRASH** (a truck accident) leads to **LIVE VIDEO** (a person streaming from the scene), which is used for **DISPATCH** (a dispatcher at a computer) and **EYES ON SCENE** (a responder in a vehicle viewing the video). This leads to **RESPONSE** (a fire truck and ambulance arriving at the scene).

### Before, during, and after-action

Responders juggle a variety of responsibilities in the moments leading up to an emergency. Our team at Prepared knows this and that's why we built a product that can help responders at **each phase of emergency response**. Whether you need to watch live video from the scene while en-route, use GPS location to locate the caller, or analyze evidence after-action, Prepared's software can help.
