These Dell PowerVault pre-configured solutions allow customers to start small with direct connect options but continue to evolve as the mission changes into SAN solutions meeting the mission's infrastructure needs. These solutions are designed to provide continual tactical advantages for the core data center. Please review the specifications and reach out to your strategic partner or Dell Technologies account team if there are any further questions. All solutions have been designed with the following capabilities:

- 10/25GbE connectivity
- 3 years of ProSupport
