Know Your Data. Protect Your IP. Unleash AI Velocity.

Thank you for your interest in exploring this content.

Carahsoft is the **Trusted Government IT Solutions Provider**® supporting a broad portfolio of industry-leading technologies through NASA SEWP V and E&I Carahsoft Cloud Solutions & Services Distributor Contract and a wide range of other contract vehicles.

As the **Master Government Aggregator**®, Carahsoft connects government agencies, industry partners, and technology providers to deliver innovative, mission-focused solutions.

In partnership with Secuvy, we provide technology solutions that drive modernization, strengthen operations, and ensure compliance with evolving government standards.

secuvyai

KNOW YOUR DATA.
PROTECT YOUR IP.
UNLEASH AI VELOCITY.

Don't let the data you do not know about make decisions for you. Secuvy finds, classifies, and continuously governs every file before it ever reaches AI.

THE PROBLEM

Unknown data creates known consequences.

SECURITY	BUSINESS VALUE	AI INITIATIVES	INFRASTRUCTURE
Unknown data exposure.	**IP leaks erode the moat.**	**Extended timelines.**	**Wasted GPU cycles.**

WHY RULES FAIL

There are two kinds of sensitive data. Rules only keep up with one.

PATTERN DATA

PII, payment data and known identifiers have stable signatures. A rule can match what is already defined.

RULES WORK

SECUVY WORKS

NON-PATTERN DATA

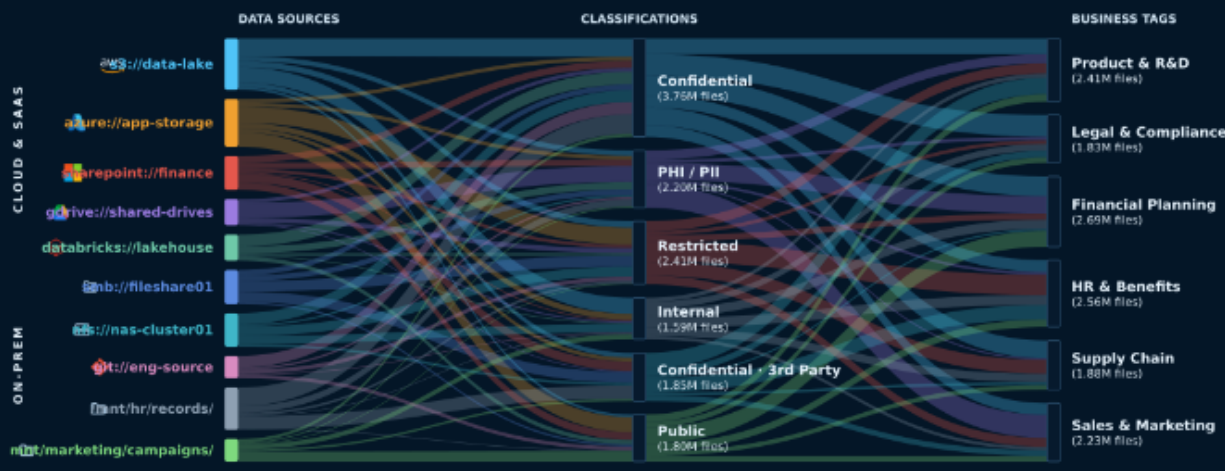

Design IP, source code, strategy, research and correlated risk have no universal pattern. Meaning only appears in context.

RULES BREAK

SECUVY WORKS

THE SECUVY DIFFERENCE

With Secuvy, you know what you own.

Data sources are classified by meaning and context, then mapped to business use. The map builds itself and stays current as files move, change and multiply.

CONTEXT CHANGES EVERYTHING

Secuvy catches correlated IP before an outsider can.

1 EACH FILE LOOKS SAFE

Five files across five systems. No SSN, card number or keyword on the block list. Every traditional scan says safe.

2 FILES CONTAIN CORRELATED RISK

One entity appears under four names across five systems. Secuvy connects them and maps the linkage, not just each file.

3 EVERY LINKED FILE IS PROTECTED

All five files inherit the sensitivity they reveal together. Every one is governed or blocked before reaching a model.

PROOF FOR EVERY PIPELINE

Organize and understand all your data for AI.

A verifiable Data Bill of Materials shows you what you have, what is appropriate for AI, and what is not.

AI DATA PLANE DATA BOM pipeline: support-rag-prod

5	2	3	1	1.11 TB
TOTAL ASSETS	CRITICAL RISK	LLM BLOCKED	COMPLIANT	TOTAL SIZE

ASSET NAME	CATEGORY	STORE	SENSITIVITY	LLM STATUS	RISK	GOVERNANCE
Clinical trial notes	Unstructured	S3	Critical	Blocked	94	Needs review
Internal source code	Trade secret	NFS	High	Blocked	77	Needs review
CAD assemblies	CUI / ITAR	SharePoint	Critical	Blocked	92	Needs review
Support emails	Unstructured	Box	High	Sanitized	75	Non-compliant
Public product reviews	Unstructured	NFS	Medium	Allowed	37	Compliant

Every asset scored, classified and decided before it ever reaches AI.

CONFIDENCE AS AN ADVANTAGE · ACCURACY AS AN ASSURANCE · COMPLIANCE AS AN ACCELERATOR
