Acrobat DC Disclaimer for Government Customers:

A. Acrobat DC products purchased under the BPA are perpetual licenses for on-premise use under Adobe's CLP Government program. Customers are cautioned that the Acrobat DC products can connect to Document Cloud services to include managed services and cloud storage features that the Government may not be able to use at this time. Therefore, on deployment, cloud features can be turned off through a customization wizard which is an Acrobat tool to turn off the various services.

B. Acrobat DC licenses purchased under the BPA are intended for on-premise use and the following instructions are provided to disable all cloud features. The customer's IT administrator can disable the Acrobat DC cloud services prior to the installation of Acrobat DC as follows:

   a. Run the Customization Wizard and select the "Online Services and Features" option. Then check the boxes to disable all services, or the services you wish to disable.

C. Alternatively, customers can purchase the Acrobat DC product and install the prior version, Acrobat Version 11

D. **NOTE: Customers are strongly encouraged to consult with your IT administrator and agency specific rules before implementing use of any cloud services and/or cloud storage features. If the Acrobat DC Cloud features are not turned off, additional On-Demand Services and Managed Services terms and conditions would be applicable, and your use of cloud services would be at your own risk.**
