

# Rubrik

**Our mission is to secure the world's data.**

## **Reduce Cyber Risk and Protect Patient Data**

Protect and quickly recover EHR, enterprise, cloud and SaaS data from cyber attack. Centralize management and minimize data risk to continue delivering excellence in patient care.

TJ Puccio, Account Executive - Federal Healthcare: [TJ.Puccio@rubrik.com](mailto:TJ.Puccio@rubrik.com)

## **Why Rubrik?**

### **Recover Rapidly From Cyber Attacks**

Restore data in mission-critical workloads like Epic on Azure and Microsoft 365 from natively immutable backups. Confidently focus on patient care and meeting research and operational deliverables on time.

### **Centralize Data Protection**

Manage and automate protection across your EHR, unstructured data and more - in one platform. Easily scale operations as you consolidate data centers, transition to the cloud, or gain new staff and systems.

### **Strengthen Cyber Posture**

Prepare for and detect cyber threats, determine attack scope, and reduce sensitive data exposure risk. Help meet cyber insurance requirements with a zero trust architecture and adherence to the NIST framework and prove that your growing hospital, lab or research facility is prepared to be resilient against cyber attacks.
