

Cohere for Defense

Secure AI for Defense:
Your Mission. Your Data.
Your Advantage

Thank you for your interest
in exploring this content.

Carahsoft is the **Trusted Government IT Solutions Provider**® supporting a broad portfolio of industry-leading technologies through NASA SEWP V and a wide range of other contract vehicles.

As the **Master Government Aggregator**®, Carahsoft connects government agencies, industry partners, and technology providers to deliver innovative, mission-focused solutions.

In partnership with Cohere, we provide technology solutions that drive modernization, strengthen operations, and ensure compliance with evolving government standards.

Cohere for Defense

Secure AI for Defense: Your Mission. Your Data. Your Advantage.

Cohere is building foundational AI models and end-to-end agentic products for defense. Trusted by defense organizations globally where outcomes have real-world impact, Cohere models deploy anywhere you need—including on-prem, air-gapped, and edge environments—with zero vendor lock-in. Built for environments where security is uncompromising, Cohere delivers a full-stack, defense-grade AI architecture for mission success.

Accelerate Mission Outcomes

Plan & Analyze with Confidence

Generate optimized mission plans, simulate operational scenarios and run rapid options analysis using historical and real-time data.

Enhance Awareness Across Domains

Fuse multi-domain ISR collection and other intelligence streams for a unified common operating picture to drive faster, more informed action.

Empower Tactical Edge Operations

Deliver real-time, context-aware guidance and automated reporting, even in disconnected, contested or denied environments.

Strengthen Operational Readiness

Optimize Logistics & Sustainment

Predict supply needs, anticipate maintenance issues and support precise resource delivery to forward sites.

Reduce Operator Burden

Automate routine documentation and triage tasks so warfighters can focus on mission execution.

Why Cohere?

Mission-Aligned Models

Custom-built models tuned to defense terminology, mission context and operational domains.

Sovereign by Design

Deploy entirely within accredited DoW networks with zero external vendor access or data retention.

Low-Compute, High-Performance

Run advanced AI in TOCs, C2 nodes and tactical edge environments, even on only two GPUs.

Seamless Integration

Designed for interoperability with existing defense systems, tools and data pipelines.
