DEI

Digital Evidence Investigator®

**1**

Collect

- Capture RAM to acquire volatile memory
- Custom and Built-in Search Profiles
- Conduct live and boot scans on Windows, Linux, macOS, and ChromeOS
- Scan external devices (USB, CD, DVD, SD cards, etc.) attached to the workstation

2

Analyze

- View links between files of interest and user activities
- Filter search results with sorting and search capabilities
- Leverage facial analysis age detection

3

Report

- Portable standalone viewer to share with investigators and prosecutors
- HTML, CSV, and PDF reporting options
- Export JSON to 3rd party applications

Add-On Capabilities

- Central management capabilities
- License Server (check-in-check-out)
- Audit Server (report across the agency)
- 230+ language translation with text analysis, entity extraction, and gisting

The screenshot displays the DEI software interface. The main window shows a grid of image thumbnails, including various bridges and military equipment. A sidebar on the left contains navigation icons for Close, Summary, Pictures, Videos, Keywords, Timeline, Files, Scan log, Tagged, Report, and More. The bottom panel shows the file properties for a selected image:

ADF is an incredibly easy-to-use forensic software that allows us the ability to collect actionable intelligence in the field. Additionally, ADF has significantly reduced the time it takes to complete our forensic caseload by over 80%; Not only saving time but more importantly, saving lives. - Stephen Komorek, API Consulting Group
