Maximize Your Private Cloud to Accelerate Federal AI

The GSA ONEGOV Agreement accelerates the transition to a secure, AI-ready government. By extending **VMware Cloud Foundation (VCF)** capabilities, these solutions enable agencies to deploy modern applications faster while enforcing a multi-layer, Zero Trust defense. This integrated approach reduces total cost of ownership (TCO) and ensures existing private cloud investments are optimized for the demands of agentic AI and mission-critical security.

Products	Capabilities	Discount
VMware Avi Load Balancer	Avi delivers an elastic, software-defined application delivery fabric that replaces rigid, expensive hardware appliances with automated, cloud-native scaling. It reduces TCO by 70% by eliminating over-provisioned hardware and providing transaction-level visibility that legacy box-based solutions cannot achieve.	64%
VMware vDefend	vDefend provides AI-driven, hypervisor-embedded security designed to stop ransomware and other threats from moving laterally within the data center. By integrating directly into the VCF fabric, it enforces granular Zero Trust policies across all "East-West" traffic without the need for complex hardware hair-pinning.	64%
VMware Tanzu Data Intelligence	This unified data lakehouse delivers low-latency, governed access to multi-modal data for agentic AI and advanced analytics. Unlike traditional silos, it uses federated querying to analyze sensitive data where it resides, eliminating the cost and security risks of moving massive datasets.	64%
VMware Tanzu Platform	Tanzu Platform provides a pre-engineered, AI-ready application environment that automates the "paved path" to production for mission-critical software. It uniquely accelerates federal delivery by integrating continuous compliance guardrails directly into the developer workflow, cutting cATO timelines by up to 70%.	64%

Frequently Asked Questions

Where to Purchase:

- Carahsoft's GSA MAS IT

Additional Resources – please provide the links

- [VMware Government IT Solutions | Carahsoft](#)
- [VMware Live Tech Demos | Carahsoft](#)

Who is eligible for the promotion?

- All U.S. federal government agencies
- Existing customers

How can I purchase?

- GSA MAS IT
