The Dell AI Factory

Dell's approach to embracing and implementing AI

AI Use Cases

Dell Model	Description	Reference ID	Estimated Cost
Precision GB10			\$6,400
PowerEdge R670 (with a GPU)	2 16C / 256GB / 4 3.84TB / BOSS	21728738.1	\$151,961
PowerEdge R770 (with a GPU)	2 16C / 256GB / 4 3.84TB / BOSS / RTX6000Pro	21728706.1	\$190,259

These Dell EMC PowerEdge pre-configured solutions allow customers to begin to harness AI within their agency. Starting small, evaluating multiple AI(s), and growing on demand by serving as a building block for the mission's continuous AI needs. These solutions are designed for the most common use cases, ranging from investigating AI to deploying the LLM of choice. Please review the specifications and reach out to your strategic partner or Dell Technologies account team if there are any further questions. All solutions have been designed with the following capabilities:

- Intel Multi-Core CPU
- Integrated Hardware RAID
- Trusted Platform Module
- 10GbE Networking / nVidia ConnectX
