# Uber for Business

## Keep moving, with safety top of mind

Protecting you is our top priority. When it comes to safety, the work never stops. We're continuously improving our safety measures to help you feel confident every time you ride for work.

### We're raising the bar on safety

#### Adaptable technology

We build in-app features to help keep you safe—from live location sharing with Trusted Contacts to GPS tracking that detects if a trip goes unusually off course.

#### Nationwide standards

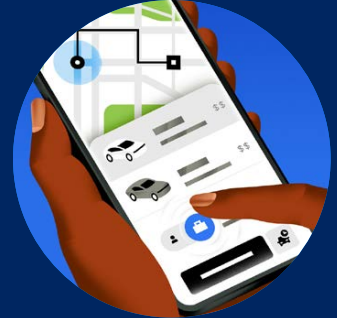

Uber's proactive everywhere the app is available. Whether you're traveling in-state or out-of-state, you can rely on Uber to support your journey.

#### Business support

All riders have access to 24/7 in-app support, including a dedicated team for critical situations and built-in emergency assistance features.

Once you requests a ride with Uber, our technology helps ensure your trip is a smooth one, wherever they need to go.

## Before each trip

Our commitment to safety starts before the car pulls up.

### No more street hails

Request a ride and wait safely indoors until your driver arrives.

### Extra trip verification

If opted into Verify Your Ride, employees get a unique PIN in the app before their ride begins. Drivers will need to enter this PIN into their app to start the trip.

### Anonymous communications

If a rider and driver need to contact each other, the Uber app anonymizes both numbers to help protect everyone's privacy.

## During each trip

Once a business trip begins, our tech works hard to help the journey run smoothly.

### GPS-tracked trips

All rides on Uber are GPS-tracked from start to finish. Riders can see their route and car location—and make sure they're headed in the right direction.

### Live location sharing

Riders can share live trip details including their real-time location with their Trusted Contacts during the ride.

### Emergency Button

Uber's in-app Emergency Button allows riders to contact local emergency services directly and shows the rider's real-time location in the app.

### No need for cash

Uber allows for seamless, cashless transactions, which means no more arguing over fares, broken credit card readers, or lack of change.

### Safety Toolkit

By tapping the blue shield while on a trip, riders can feel more protected and connected on every trip with access to emergency assistance and additional safety options.

## After each trip

Our commitment to safety continues even after your travelers' trips end.

### 24/7 in-app support

Whether someone has left their meeting notes in a vehicle or has a question about a ride, our Customer Support team is there to help 24/7.

Uber for Business is a global, online platform that simplifies how your business moves.

**Protect your people and your business and get started today.**
