Procore for Government

Federal-Grade Security for Mission-Critical Capital Programs

Secure, centralized platform purpose-built for capital infrastructure programs

Procore for Government is the purpose-built construction management platform for delivering complex, high-stakes capital programs in a secure and regulated environment. It unites internal teams, contractors, and delivery partners in one system that helps drive progress, maintain data accuracy, and provide clear visibility from planning through closeout. Designed to meet the operational demands and compliance requirements of government projects, it provides the tools and protections needed to help control risk, steward public funds, and deliver consistent, measurable results.

Core Benefits

Achieve Accuracy and Accountability

Deliver projects to high standards with consistent, verifiable data. Structured workflows and centralized records provide the transparency and accountability required at every stage of the capital project lifecycle.

Protect Public Project Success

Help reduce risk, control costs, and keep schedules on track by connecting all stakeholders in one secure platform. Real-time information capture creates a trusted record that supports oversight and confident decision-making during the project and long after completion.

Build Future-Ready Capital Programs

Adopt technology that scales with your needs and adapts to evolving project requirements. Out-of-the-box functionality, best-in-class mobile tools, and proven adoption help you deliver today's projects while preparing for tomorrow's demands.

Capabilities That Deliver

Secure and Mission-Ready

When FedRAMP Moderate Equivalent, Procore for Government will help contractors meet CMMC Level 2 requirements.

Centralized Collaboration

Unite stakeholders in one secure platform. Automated workflows for processes like RFIs, change orders, and inspections keep processes moving and help eliminate the risks of version conflicts or missing documentation. Tightly governed financial management, centralized model storage, and rigorous quality control help give stakeholders more complete oversight and actionable insight across the entire construction lifecycle.

Real-Time, Accurate Data

Capture information at the point of activity through intuitive mobile tools, ensuring it is consistent, timely, and reliable. Structured data creates a single source of truth that supports performance tracking, informed decisions, and program-wide reporting.

Capital Program Oversight

See the full picture across your portfolio. Track program-level KPIs alongside project-specific cost drivers, schedule risks, and field performance to make proactive adjustments and help keep objectives on track.

Streamlined Audit Readiness

Help minimize the risk of ineligible expenditures and expedite audit preparation with organized, time-stamped records and automated workflows that make documentation easy to find and review.

As the leader in end-to-end construction management, Procore delivers structured, standardized data across every phase, turning project information into lasting insights that help shape smarter decisions and stronger outcomes for years to come.

Secure, Compliant Cloud

Procore for Government is hosted in the Procore Government Zone, a secure, cloud-based environment built for the demands of government construction. It creates a trusted space for agencies, contractors, and partners to store, manage, and collaborate across projects. Government Zone delivers high availability, fast access, and scalable performance. Advanced protections such as encryption, role-based access controls, and continuous monitoring help safeguard information and support compliance.

Procore has obtained FedRAMP® “In Process” status for the Procore for Government platform and is pursuing FedRAMP Authorization at the FedRAMP Moderate Impact Level.

Procore for Government will help contractors meet CMMC Level 2 requirements by reducing compliance complexity and limiting exposure across fragmented systems. All activity stays within a secure platform built for construction.

Procore for Government

Procore for Government is built exclusively for the public sector and its delivery partners, offering a specialized version of Procore’s core solutions with out-of-the-box functionality informed by industry best practices, best-in-class mobile tools, and the security, compliance, and capabilities government projects demand:

- Analytics
- Bid Management
- BIM
- Design Coordination
- Financials
- Invoice Management
- Project Management
- Quality & Safety
