

AMP^{GSTM} Intelligent Document Processing with AWS

UNLOCK EFFICIENCY IN HEALTHCARE: TRANSFORM INFORMATION INTO ACTIONABLE INSIGHTS

The healthcare industry has been keeping records for centuries. Those records come in many formats and contain vital health information. From insurance claims, doctor’s notes, risk adjustments and more, this information is at the core of your business operations and require a large sum of time and resources to process. With our Intelligent Document Processing solution on AWS, you can process these documents and more in days instead of weeks or months, eliminating slow, error-prone work that comes with paper records.

Intelligent Document Processing Transformation

Go beyond OCR with accurate, versatile information extraction to enhance operational efficiency, unlock insights, and bolster decision-making. TEKsystems Global Services’ proprietary document processing framework transforms untapped data into decisive action, leveraging AI and ML techniques to extract relevant information from all kinds of vital documents, images, forms, video files, and more.

- ML Services Competency
- Security Services Competency
- Data & Analytics Services Competency

Scanned Documents

- Patient records
- Claim forms
- Doctor’s notes
- Clinical reports
- Appeal requests
- 835 and 837’s
- Continuity of Care (CCD)
- Member onboarding forms

Solution Benefits

<p> INCREASED DATA ACCURACY Process documents faster and more accurately, reducing errors caused from manual entry</p>	<p> FASTER DATA PROCESSING Accomplish a weeks or months worth of work in a matter of days and enable employees to spend time on value-adding tasks</p>
<p> PATIENT & MEMBER FOCUS Simplify the internal review process, reduce delays, and improve turnaround times for patients and members</p>	<p> LOWER OPERATIONAL COSTS Automate document workflows and reduce complexity of paper-based records</p>
