

These Dell EMC PowerEdge pre-configured solutions allow customers to start small and grow on demand by serving as a building block for the mission's infrastructure needs. These solutions are designed for the most common use cases, ranging from small to large deployments. Please review the specifications and reach out to your strategic partner or Dell Technologies account team if there are any further questions. All solutions have been designed with the following capabilities:

- Intel Multi-Core CPU
- Trusted Platform Module 2.0
- Integrated Hardware RAID
- 10GbE Networking
- Boot Optimized Server Storage (BOSS)

## Adaptive compute

Engineered to optimize the latest technology advances for predictable profitable outcomes

**Developing**  
workload-focused platforms within the PowerEdge portfolio

**Integrating**  
the latest technologies across the PowerEdge portfolio to help you grow

**Helping**  
Find your edge & Achieve Success at any Scale

## Autonomous compute infrastructure

Intelligent systems that work together and independently, enabling rapid digital transformation and productivity

**Leading**  
the server automation race today with our extensive capabilities

**Building**  
easy automation in your org through our information and integration solutions

**Outlining**  
the path to success for full automation with our comprehensive strategy

## Proactive resilience

Systems and software designed for secure interactions and the capability to anticipate potential threats

**Platform security**  
with an industry leading secure supply chain

**Continuous innovation**  
designed to bolster your cyber resilience

**Mitigate risk**  
through intelligence, automation and recovery tools
