Only 30% of CIO’s believe their business can recover from a disaster scenario.

Enterprises can’t afford to have mission-critical applications perform poorly — much less, have them down — for any period of time. But they also want the benefits of flexibility and scale that today’s modern, multi-cloud architectures offer. Achieving both, cost-effectively, is possible, but only with Veritas.

The Enterprise Data Services Platform offers solutions in the three areas that matter most: availability, protection, and insights. It’s the most versatile and extensible platform available to enterprises and represents the perfect IT foundation. It’s built on a NetBackup 8.2 core and supports 500+ data sources, 150+ storage targets and 60+ clouds—and it can be deployed in any form factor today.
Thank you for downloading this Veritas Infographic! Carahsoft is the public sector distributor for Veritas solutions available via the GSA Schedule 70 contract vehicle.

To learn how to take the next step toward acquiring Veritas’s solutions, please check out the following resources and information:
