

# ForceMetrics Flyer

## Community Impact in Every Officer's Hand

### Modern Tech Built on Existing Legacy Systems

Centralized search and modern mapping across 911 call notes, reports, and jail data—even 311

Search Anything: fuzzy spellings, partial numbers, location radius

Bringing a Google-like feel to searching your data—regardless of what CAD or RMS system your team uses—along with support across the whole range of mobile devices, navigating your data has never been easier.

### Data Insights without Added Training or Staff

Automated call classification and report summarization to increase efficiencies for both officers and dispatchers

Detect patterns and trends for better resource allocation

Too much data; too little time. Our data algorithms effectively and reliably tag and summarize call information, reducing multiple paragraphs to just a couple sentences. We provide you with views to reveal trends and patterns in your data.

### Early Warning On-Scene Community Interventions

Data dashboards: deeper view on gun violence, mental health, homeless, overdoses, juveniles

Safety Tags: Reduce risks on-scene to officers & community

We reveal trending topics, repeat victims and offenders, and even common threads between calls. Our data dashboards provide a deep overview of high priority issues in our communities—domestic violence, drug overdose, and more.

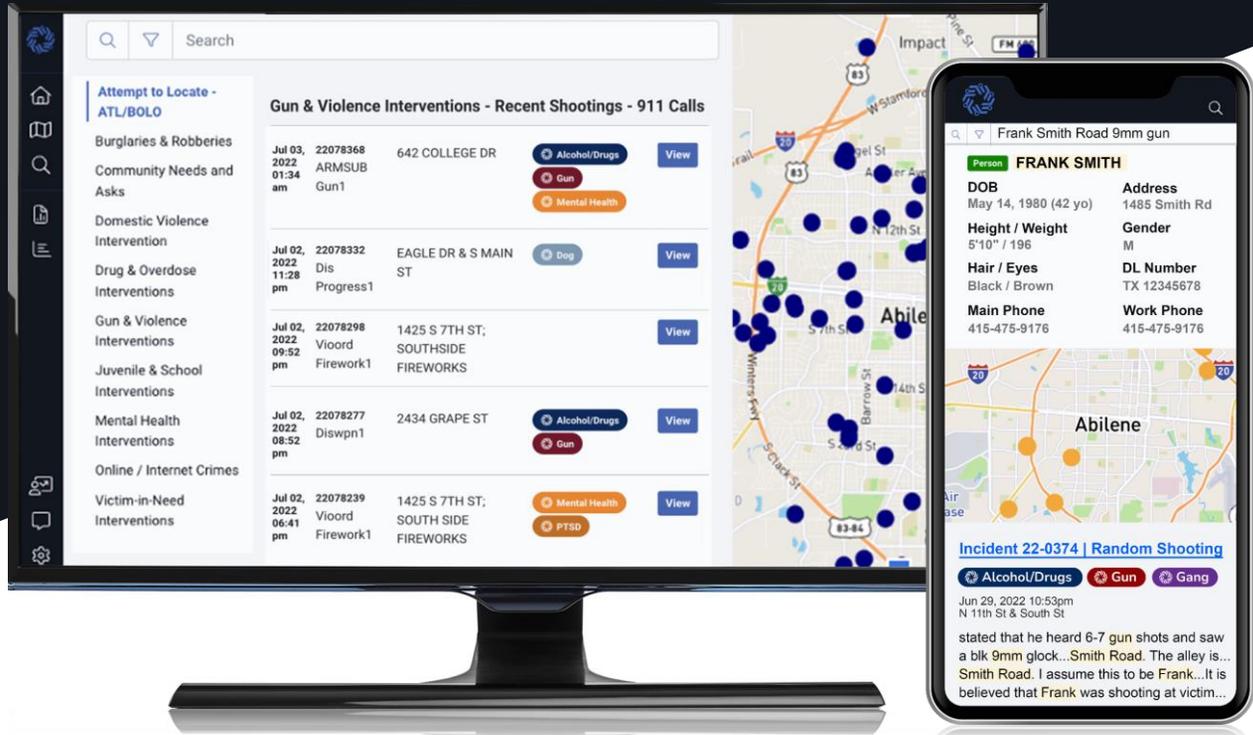

Auto-generated color-coded tags quickly provide officers and dispatchers with better situational context and surface important information about calls, people, and addresses.
