Microsoft 365 Copilot: Getting You Cleared for Takeoff

Government agencies, when leveraging AI tools like Microsoft 365 Copilot, must ensure these technologies enhance operationally efficiency while safeguarding privacy, security, and ethical standards. By doing so, AI can responsibly contribute to solving critical challenges, fostering innovation and bolstering security in a manner that helps the government provide better services.

Your AI "Captain" for Copilot Enablement

Who should get Copilot licenses	Training and adoption	Measure user adoption	Data security and oversharing
Enforce data compliance	Remove outdated data from Copilot	Maximize Microsoft investment funding	Enable lifecycle management

AvePoint Enhances Efficiency and Security

Mission:

Offer you a comprehensive consultation and risk assessment service to seamlessly integrate Microsoft 365 Copilot into your organizational framework. Our experts collaborate with your stakeholders, ensuring your organization is fully equipped for a successful Microsoft 365 Copilot rollout.

Assessment Deliverables:
- Current State Assessment
- Strategic Roadmap
- Business and Technical Requirements
- AvePoint Confidence Platform POC

Project Duration:
- 4-8 week with pre-engagement architecture and security review to deploy the AvePoint Confidence Platform to your tenant

ENGAGE
Host 4-8 workshops to educate on Copilot capabilities and understand the current state of Microsoft 365 governance.

PLAN
Perform a gap analysis between current and desired future state for Microsoft 365 governance. Identify and prioritize use cases to be piloted using the AvePoint Confidence Platform.

PILOT
Configure the AvePoint Confidence Platform to demonstrate governance remediation through platform automation.
