# EOY ESG Promo Discounts:
DLP, Carbon Black EDR & App Control

To receive pricing and/or to schedule an overview reach out to:
BroadcomFED@carahsoft.com or call 571-662-3260

Symantec DLP and Carbon Black EDR and App Control are designed to help customers with end-to-end protection across their on-premise, cloud, and air-gapped installs. Included in this promotional offer are security tools to help agencies achieve a full Zero Trust security posture. Let's work together!

Federal agencies face fragmented IT procurement processes, leading to inconsistent pricing and workflow bottlenecks. To help agencies move faster, work smarter, spend less money and protect sensitive data, GSA and Carahsoft launched a Broadcom promotional discount for a limited time only. Through this promotional discount, agencies gain exclusive access to deep discounts on three of the top IT security products that are foundational to compliance and protecting government assets.

As part of the offer, we will provide a **75% discount** for GSA list price to FED customers who are purchasing net new licenses.

Symantec DLP
• Symantec DLP – A Single Console for Policy management, reporting, and incident response • Symantec DLP – The Highest Level of Data protection

Carbon Black App Control & EDR
• Carbon Black EDR – Continuously records endpoint activity for threat hunting and incident response; allows team to detect and respond to advanced threats even in air-gapped environments • Carbon Black App Control – Provides positive security model that only allows trusted and approved software to run on your systems effectively stopping malicious attacks

Where to Purchase:
The bundle is available exclusively on Carahsoft Technology Corporation's GSA Schedule and available through eligible Commvault/Carahsoft Federal resellers.
