USE CASES: SEARCH AND RESCUE

Prepared Live

with OnScene | Coordinate **Search and Rescue**

Advances in emergency technology have helped ensure that public safety agencies almost always have some idea of a caller's location. Like all technology, however, these processes have their limits. **Video has proven to be an essential asset or a valuable supplement for locating and helping 9-1-1 callers.**

Reliably Obtain GPS Location...

📞

...Even if the Call Comes on Your Non-Emergency Line

Outbound text enables you to bypass standard processes.

📶

...Even when Provided Location is Broad or Inaccurate

Technology is not perfect and sometimes location ranges are broad or entirely wrong.

📍

...Even when the Caller Doesn't Know Where They Are

Tourists, new explorers, or just people that are confused, are liable to not know where they are.

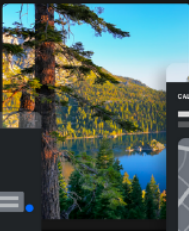

📹

...And Share Live Video Directly with Your Field Responders

Give the search and rescue team eyes-on-scene before they arrive so they can hit the ground running.

CALLER LOCATION

BETTER INFORMATION, BETTER RESPONSE

Live video provides something that verbal-only 9-1-1 calls simply cannot: **eyes-on-scene before field responders arrive**. By acquiring live video from the caller, and sharing it with your field responders, you can enhance your team's ability to find a lost caller and execute a search and rescue.
