# HITACHI FEDERAL FOR GEOSPATIAL INTELLIGENCE

## What is Geospatial Intelligence?

GEOINT (Geospatial Intelligence) is continuing to grow as missions increase in complexity as technology advances. As GEOINT missions grow in complexity, organizations buckle under pressure. Enhanced technology allows data to be more easily analyzed, creating a smoother process and increased efficiency.

## How Can Hitachi Help?

Hitachi provides multiple services and products that help GEOINT grow and function more efficiently. Hitachi Vantara Federal delivers and supports new digital solutions allowing for the advancement of federal missions at all data maturity levels. Virtual Storage Platform One is Hitachi Vantara Federal's next-generation storage solution, designed to simplify complex data storage, enabling organizations to consume and manage structured data between multiple platforms.

## Virtual Storage Platform One

Designed for reliability, speed, and simplicity, Hitachi's Virtual Storage Platform One is a hybrid cloud data platform which allows a unified data plane.

## HCP Anywhere Enterprise

Hitachi's cloud file service allows GEOINT professionals to access important data while collaborating with others, all while maintaining security of the data.

## Infrastructure for GEOINT

Agencies should treat infrastructure as a strategic differentiator in the GEOINT industry. If given the right hybrid cloud infrastructure, data can be converted into actions. Hitachi can help get the process of creating the future of GEOINT started.
